Before Use

- The device must be connected to the Internet. Please check if the connection is setup correctly.
- Please confirm the Internet access ports are open. The default ports to open are: 80, 554, and 37777. To modify the default ports, please refer to DDNS User's Manual.
- Please enable UPnP and PPPOE functions on the device if needed. For UPnP and PPPOE setup, please refer to DDNS User's Manual.
- The default username and password are admin/admin. You should change your password at the first login.
- The IP address of the DVR can be found in the Setting>Network>TCP/IP section.
- DDNS management website: www.quickddns.com
- The device supports monitoring and DDNS management via a smart phone. You need to download the App first.
- Please keep the tag of the device's MAC address. Do not lose or destroy it.
- Quick DDNS service is disabled by default, and to enable it, you need to login first.

Enable Domain Name Access

After the device boots up, please wait 1 to 3 min until the network indicator becomes green. Input the device IP address (found in the Setting>Network>TCP/IP section) in a web browser. After logging in, go to Setup>Network>DDNS. You can modify the DDNS setup in the corresponding fields.

Please see Figure 1.

The screenshot shows the DDNS configuration interface. On the left, a sidebar lists various settings categories: CAMERA, NETWORK, EVENT, STORAGE, and SYSTEM. Under NETWORK, several sub-options are listed, with DDNS highlighted in blue. The main content area is titled 'DDNS' and features a 'Enable' checkbox that is checked. Below this, there are several input fields: 'DDNS Type' is a dropdown menu set to 'Quick DDNS'; 'Server IP Address' is a text box containing 'www.quickddns.com'; 'Domain Mode' has two radio buttons, with 'Default Domain' selected; 'Domain Name' is a text box containing '9002A9B97788', followed by a suffix '.quickddns.com' and a 'Test' button; and 'Email Address' is an empty text box with the note '(Optional)Please input email address.' below it. At the bottom of the form are three buttons: 'Save', 'Refresh', and 'Default'.

Figure 1 Enable Domain Name Access

For server type please select Quick DDNS and enable DDNS by checking the Enable box. Click on OK to save.

Default Domain Name Access

The default domain name of device is: MAC address.quickddns.com

For example, current device MAC address is: 90:02:A9:01:08:84. You can input domain name as 9002A9010884.quickddns.com in a web browser to access the device. If the device is connected through a router, then you need to log on the router to view all of the mappings and access the device via the domain name plus port number.

Note:

The MAC address of each device is labeled at its rear. When you input the domain name in a web browser, you should exclude the “:” symbol.

Custom Domain Name

After the device boots up, input device IP address in a web browser. After logging in, go to Setup>Network>DDNS. You can modify the DDNS setup in corresponding fields.

Please see Figure 2 Custom Domain Name.

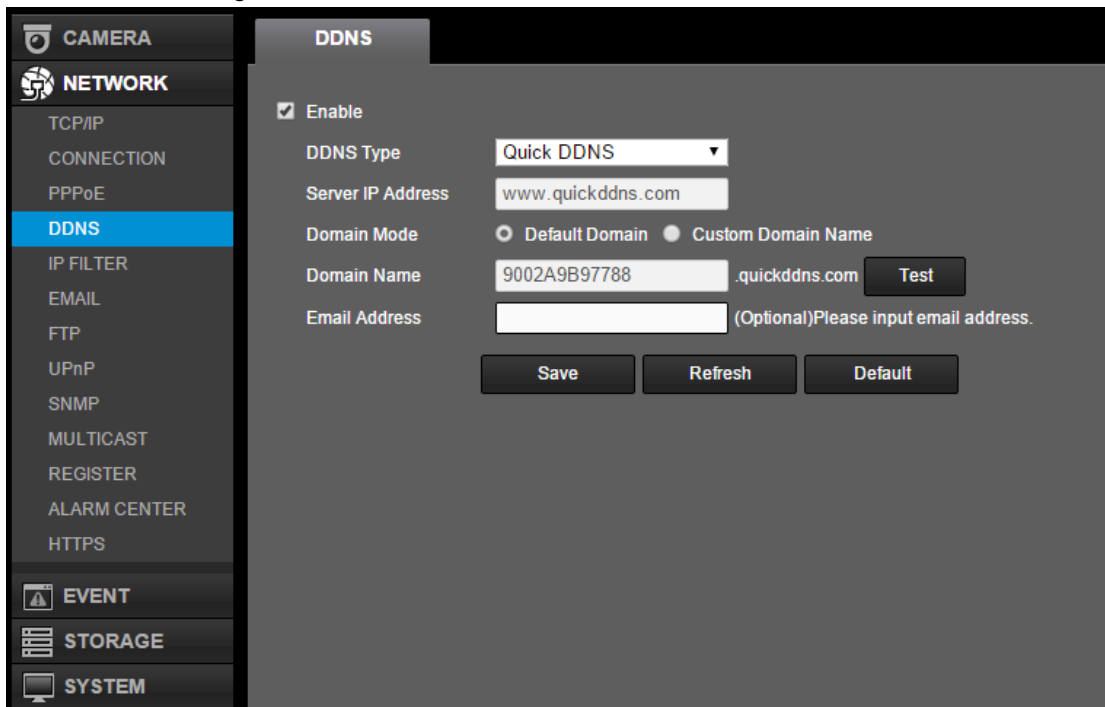

Figure 2 Custom Domain Name

Server Type: Quick DDNS

Server: www.quickddns.com (This cannot be changed.)

Mode: Auto, manual (The default is auto and is access via the device MAC address. For a custom domain name, you need to switch to manual mode first.)

Domain Name: The default domain name is device MAC address. You can customize it here.

Click on Test to verify if your new domain name doesn't already exist. If it exists, please use another domain name until you have a domain name that is not used. If it does not exist, you may continue with your new domain name. If the device is connected through a router, then you need to log on the router to view all of the mappings and access the device via the domain name plus port number.

Username: You can centralize management over multiple devices by providing a valid username (email address) here. You need to visit www.quickddns.com and register with that username. If you have registered already, then fill in the registered username in this field.

Please see Figure 3 Local GUI.

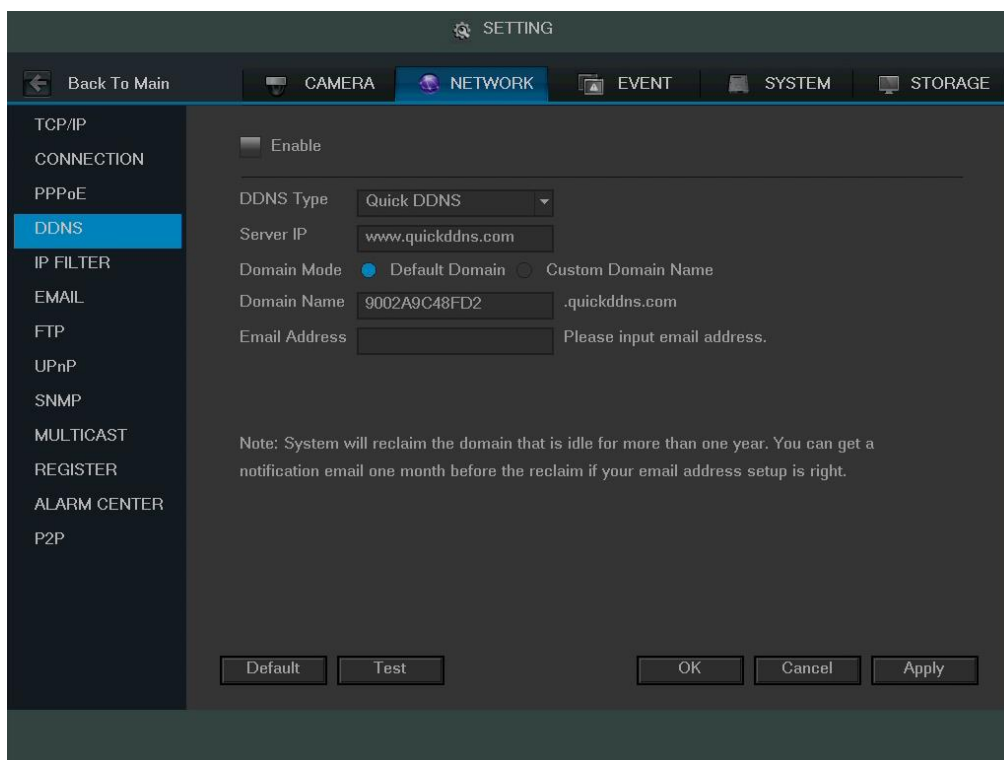

Figure 3 Local GUI

Note:

- Domain name format: any combination of 0-9, A-Z, a-z, no special symbols. Max 60 characters.
- Please fill in the correct username to avoid device ownership problems.

DDNS Web Registration and Management

DDNS web address: www.quickddns.com

Please see Figure 4 DDNS Login

Figure 4 DDNS Login

DDNS Registration

Click on the Not Registered link to enter the registration page. Follow the instructions to complete registration.

Please see Figure 5 DDNS Registration.

The image shows a registration form titled 'Please fill in user information'. The form is organized into two columns. The left column contains the following fields: 'User Name:' (with a red asterisk), 'Password:' (with a red asterisk), 'Confirm Password:' (with a red asterisk), 'Real Name:', 'Country:' (a dropdown menu currently showing 'United States'), 'Company:', 'Company Address:', 'Mobile Phone:', and 'Verify Code:' (with a red asterisk). Below these fields are two checkboxes: 'Send email one month before maturity' (unchecked) and 'I have read and I do agree to Terms' (checked, with a link to 'Terms'). At the bottom of the form are two green buttons: 'Register' and 'Reset'. The right column contains five blue informational boxes with icons and text: 'User Name should be email address', 'At least contains two types of digits lowercase letters or uppercase letters, no spaces, 6-16 bits', 'Can only contains Chinese/English/digits/underline/spaces, less than 100 bits', 'Less than 100 bits, can not contains: #*\$%+<>?;,:', and 'Less than 100 bits, can not contains: #*\$%+<>?;,:'. The final box at the bottom right says 'Please read the terms and check'.

Figure 5 DDNS Registration

Fields with * are required. Once you are done, the system will send an activation email to your username (valid email address). You must activate the registered username by following instructions in the mail before using.

Please see Figure 6 DDNS Registration Activation.

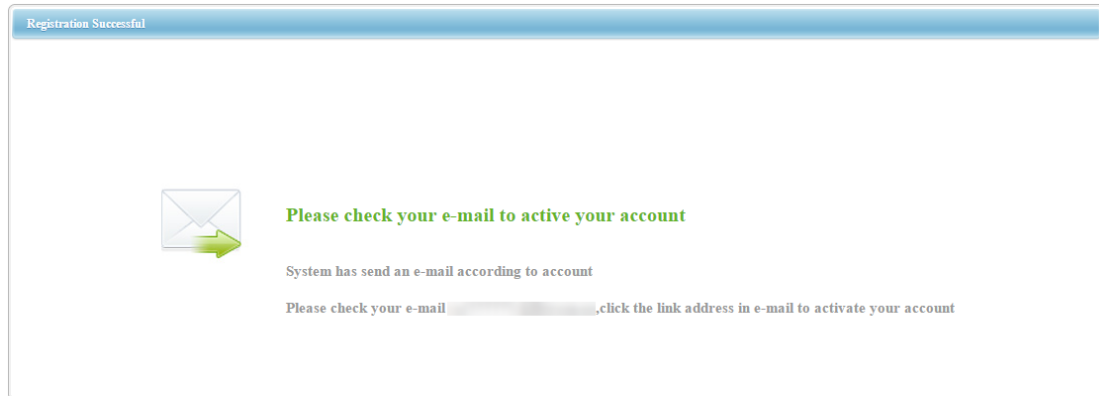

Figure 6 DDNS Registration Activation

After you have activated your username, you can login to the DDNS website to manage and view devices under your account.

Equipment

When you login to the DDNS website, go to Equipment to view and manage devices under your account. Click on the device domain name link to open the corresponding Web interface.

Please see Figure 7 DDNS Management.

Keyword Search:
