

These security bars are the perfect complement to your patio doors and sliding windows. Once installed, the bars can act as an intruder deterrent, an extra layer of security, a way to safely keep children indoors, and a method to keep your doors and windows locked in place while installing pet doors, in-window air conditioners, and other applications.

ANTI-LIFT LOCK

ROTATING BRACKET

The **anti-lift lock** adds an extra layer of security to prevent your bar from being lifted without pressing down on the tab first. The **rotating bracket** allows you to store your security bar upwards and to the side when the bar is not in use.

MODEL NUMBER	MINIMUM LENGTH	MAXIMUM LENGTH	COLOUR VARIATIONS	INCLUDED FEATURES
