Standard Storm Door Closer

Designed for light-to-medium weight storm and screen doors from 7/8" to 1 1/4" thick, this pneumatic door closer offers sure, silent closing with adjustable closing strength to firmly latch storm and screen doors. The door bracket features seasonal adjustment capabilities, allowing for stronger or weaker closing as needed per external, environmental conditions. This package comes with the necessary brackets, screws, and a standard storm door tube with a length of 10.5" and a diameter of 1.25".

Standard Door Closer With Wind Chain

Designed for light-to-medium weight storm and screen doors from 7/8" to 1 1/4" thick, this pneumatic door closer offers sure, silent closing with adjustable closing strength to firmly latch storm and screen doors. The door bracket features seasonal adjustment capabilities, allowing for stronger or weaker closing as needed per external, environmental conditions. This package comes with the necessary brackets, screws, and a standard storm door tube with a length of 10.5" and a diameter of 1.25", as well as our SK14 door protector wind chain that protects both the door and closer from excessive wind.

Standard Door Closer With Touch & Hold

Designed for light-to-medium weight storm and screen doors from 7/8" to 1 1/4" thick, this pneumatic door closer offers sure, silent closing with adjustable closing strength to firmly latch storm and screen doors. The door bracket features seasonal adjustment capabilities, allowing for stronger or weaker closing as needed per external, environmental conditions. This model of door closer additionally features the Touch & Hold system, which allows the closer to keep the door propped open with the push of a button. The Touch & Hold capabilities allows for ease of home access while hauling groceries, tools, and other cumbersome tasks. A gentle push of the door disengages the Touch & Hold feature, prompting the door closer to automatically and securely shut the door. This package comes with the necessary brackets, screws, and a standard storm door tube with a length of 13" and a diameter of 1.25".

Heavy Storm Door Closer

Made to withstand the elements, this aluminum pneumatic door closer is designed to support the weight of heavier vinyl doors, storm doors, and screen doors made of steel, wood, or aluminum with a thickness from 1 1/2" to 2". The door bracket features seasonal adjustment capabilities, allowing for stronger or weaker closing as needed per external, environmental conditions. The closing strength of the door closer can also be regulated via the adjustment screw at the end of the door closer tube. The included spring-loaded washer allows for the storm or screen door to be closed without needing to manually adjust the washer. This package comes with the necessary brackets, screws, and a heavy storm door tube with a length of 10.5" and a diameter of 1.5".

Heavy Door Closer With Touch & Hold

Made to withstand the elements, this aluminum pneumatic door closer is designed to support the weight of heavier storm and screen doors made of steel, wood, or aluminum with a thickness from 1 1/2" to 2". The door bracket features seasonal adjustment capabilities, allowing for stronger or weaker closing as needed per external, environmental conditions. This model of door closer additionally features the Touch & Hold system, which allows the closer to keep the door propped open with the push of a button. The Touch & Hold capabilities allows for ease of home access while hauling groceries, tools, and other cumbersome tasks. A gentle push of the door disengages the Touch & Hold feature, prompting the door closer to automatically and securely shut the door. The closing strength of the door closer can also be regulated via the adjustment screw at the end of the door closer tube. The included spring-loaded washer allows for the storm or screen door to be closed without needing to manually adjust the washer. This package comes with all necessary brackets, screws, and a heavy storm door tube with a length of 13" and a diameter of 1.5".

Heavy Door Closer With Torsion Bar

Made to withstand the elements, this aluminum pneumatic door closer is designed to support the weight of especially heavy storm and screen doors made of steel, wood, or aluminum with a thickness from 1 1/2" to 2 1/2". This model of heavy door closer comes with a torsion bar, which is used to provide extra closing force to aid in the latching of heavier doors. The closing strength of the door closer can be regulated via the adjustment screw at the end of the door closer tube. The included spring-loaded washer allows for the storm or screen door to be closed without needing to manually adjust the washer. This package comes with all necessary brackets, screws, and a heavy storm door tube with a length of 10.5" and a diameter of 1.5".

Heavy Door Closer With Torsion Bar & Quick-Hold

Made to withstand the elements, this aluminum pneumatic door closer is designed to support the weight of especially heavy storm and screen doors made of steel, wood, or aluminum with a thickness from 1 1/2" to 2 1/4". This model of heavy door closer comes with a torsion bar, which is used to provide extra closing force to aid in the latching of heavier doors. Similarly to our Touch & Hold models, this heavy door closer also features a Quick-Hold functionality, which provides the same convenience of a Hold-Open model without the need to push a button to enable the feature. By simply pushing the door open until the closer makes a clicking noise, the door will then remain open at 55 degrees until the Quick-Hold function is disabled. The closing strength of the door closer can be regulated via the adjustment screw at the end of the door closer tube. The included spring-loaded washer allows for the storm or screen door to be closed without needing to manually adjust the washer. This package comes with all necessary brackets, screws, and a heavy storm door tube with a length of 13" and a diameter of 1.5".

Top & Bottom Storm Door Closer Kit For Heavy Storm Doors

This unique double door closer set is designed to replace door closers that are mounted on the top and bottom of storm doors or screen doors, and is tailored for doors up to 1.5" thick. Unlike our other heavy door closers, this kit is comprised of two standard door closers - our model 9 Standard Storm Door Closer and our model 9600 Standard Door Closer With Touch & Hold. The door bracket features seasonal adjustment capabilities, allowing for stronger or weaker closing as needed per external, environmental conditions. The Touch & Hold system allows the closer to keep the door propped open with the push of a button. The Touch & Hold capabilities allows for ease of home access while hauling groceries, tools, and other cumbersome tasks. A gentle push of the door disengages the Touch & Hold feature, prompting the door closer to automatically and securely shut the door. This package comes with the necessary brackets, screws, and two standard storm door tubes.
