SK7135	2	Retail

Garage Door Safety Cables (2-Pack)

Installing garage door safety cables can help reduce the risk of damage and serious injury should a garage door spring break when it is under pressure. These 9-foot garage door safety cables with a diameter of 1/8" will prevent the spring from flying across the garage if it breaks. A spring will only break when it is under pressure, and that is when it is most dangerous. Change garage door springs in pairs and always install safety cables.

Garage Door Side Lock With Spring-Loaded Bolt

This garage door side lock is a reversible interior side lock for garage doors. It can be installed on either the left or right side of the door. The slide bolt, locking lever, and release mechanism are all spring-loaded. These features allow it to be operated from the outside, with the addition of an exterior handle for locking and/or a lock cylinder for unlocking. It also works with centered exterior handles which use cables to operate one or two interior side locks at either end. Note that this package does not come with an exterior handle, lock cylinder, or latch cables.

SKU	FEATURE	PACKAGING
SK7115	Spring-Loaded Bolt	Retail

Garage Door Side Lock, Zinc

This garage door side lock is a reversible interior side lock for garage doors. It can be installed on either the left or right side of the door. The slide bolt is spring-loaded to prevent it from accidentally sliding open or close. It is for interior operation only, as it has no slots for exterior handles or locks, nor does it have a release mechanism.
