

TeleGo's Wireless 4G Solution

- Stay connected through outages
- Reduce Downtime • Plug & Play
- Remote troubleshooting
- Automatic failover
- Static IP is available

Connect or stay connected with TeleGo's Wireless 4G Solution.

Now you can stay up and running on location, at remote job sites — even during outages and when a disaster strikes.

With Wireless 4G you control what happens to your business and ensure that your information stays safe — so that your business never skips a beat!

The device is engineered for easy and optimal installation. After we perform a site survey to identify an ideal location with optimal signal strength, connect and it's ready to go.

Once connected, we monitor its activity 24/7 and are able to perform advanced remote tests ensuring that your business keeps moving forward — no matter what!
