

New South Wales Curriculum on EP

Curriculum Guide for EP for Home

We understand that a lot of you will be new to understanding how the New South Wales Curriculum is structured. The EP team has put together this quick guide to steer you in the right direction. Enjoy the journey of working through the lessons with your child.

English, Mathematics and Science

Using the chart on the right, you can match your child to the approximate New South Wales Curriculum stage they may be capable of based on their school year group.

NSW Stage 3
NSW Stage 4
NSW Stage 5

Years 5-10:

To find resources relevant for your child, choose the NSW Stage that corresponds to their current year level. Within these folders you will find topic and strand folders for all of the content available. It is important to note that some schools may teach topics in different years but cover all curriculum areas by the end of each stage.

NSW Stage 6

Years 11-12:

For students working towards their HSC, they just need to select the topic or module that they are currently working on at school to access relevant curriculum-aligned content.

Languages

Within the languages content we have four different levels available:

- **Getting started** is aimed at primary students or beginner level secondary.
- **Beginner** is aimed at early secondary.
- **Intermediate** is aimed at mid-secondary and
- **Advanced** is aimed at senior secondary.

Our **NSW Stage 6** folder has all of our units organised according to the HSC prescribed topics.
