

Initial Assessment and it's Relationship to the Plan of Care & App

<u>Demographics</u> =	Sections 2, 8, 6, 9, 24
<u>Allergies</u> =	Section 17
<u>Vital Signs</u> =	Section 16 (current weight)

Physician Notification: the HIGH/LOW fields that you enter are mirrored in Section 21 of plan of care AS WELL AS set parameters for point of care initial assessment and notifications

Physician Notification interventions: These are where you want to enter your standard nursing orders: i.e. PDN up to 56 hours per week to monitor...'
They are the very first set of orders in Section 21 on the 485 prior to individual body systems.

<u>Diagnoses</u> =	Section 11
<u>Safety Measures</u>	Section 15
<u>Prognosis</u> =	Section 20
<u>Functional Limitations</u> =	Section 18A
<u>EENT</u> if Interventions added =	Section 21
<u>Pain</u> if Interventions added =	Section 21
<u>Integumentary</u> if interventions added =	Section 21
**<u>Respiratory</u> if interventions added =	Section 21
<u>Endocrine</u> if interventions added =	Section 21
<u>Cardiac Status</u> if interventions added	Section 21
<u>Elimination Status</u> if interventions added =	Section 21
**<u>Gastrointestinal Status</u> if interventions added =	Section 21
**<u>Nutrition</u> if interventions added =	Section 16, 21
<u>Neuro/ Emotional/ Behavioral</u> if interventions added =	Section 21 & Section 19
<u>ADLs/IADLs: Activities Permitted</u> =	Section 18B
**<u>DME</u> =	Section 14
<u>Rehab Potential & Discharge Plan</u> =	Section 22

***these sections have additional functions w/i 485 and Point of care detailed on next page*

Respiratory - Respiratory Support Section:

anything selected in the Respiratory Support field will pre-populate in initial assessment of app except 'Trach Site' assessment

If Vent is selected in Respiratory Support Field: any field filled in for vent setting will show exactly as such on 485 in Section 21 and read: 'Vent Settings...'

Gastrointestinal: Feeding tube type and Feeding Tube Size field will pre-populate in initial assessment of app

Nutrition: Any interventions added here such as 'SN to admin feed as follows...' show on the plan of care in Nutrition Section 16 and will continue on addendum

DME: To indicate what items/ tasks will be available to select in the app 'DME cleaning' section insert interventions here.

PLEASE NOTE: DME cleaning interventions should ONLY BE MARKED AS TYPE: PRN

If an item is not listed in this interventions section it will not be available to select in the app and then won't be on the DME cleaning log that can be created from patient chart
