

General Science Review

Classroom: Science Examples

Due: 1 Aug 2020

Student Name:

Date Submitted:

Earth Science

1) Name this thin and wispy cloud that is a high level cloud.

(Hint: It is often found on nice days)

2) What type of cloud stretches from the low to the high level?

(Hint: These clouds can cause violent thunderstorms with heavy rain, hail, or even tornados)

Biology

During which phase of mitosis do chromosomes...

3) separate and move to opposite sides of the cell?

4) line up in the middle of the cell?

Chemistry

5) In a molecule, what is the bond called when one atom transfers an electron to another?

6) In a molecule, what is the bond called when two atoms are shared?

Physics

7) What do physicists call a push or pull on an object?

8) What is the overall force on an object?

(Hint: You can use a free-body-diagram to find this easily)
