

ALERTS USING PREMARKET DATA

premarket high, low - use premarket data
locked, crossed, above and below - use premarket data
large bid, ask - use premarket data
crossed above, below close - use premarket data
strong volume, high volume, unusual number of prints, 1 min vol spike - use premarket data
stocktwits - use premarket data
consolidation - use premarket data
running up, down - use premarket data
SMA day cross - use premarket data
vwap - use premarket data
channel breaks - use premarket data
block trades - use premarket data
pattern recognition (rectangle, double, triple, broadening, triangle) - use premarket data
X minute high, low - use premarket data
trailing stop - use premarket data
fibonacci - use premarket data

ALERTS NOT USING PREMARKET DATA

new high, low, ask, bid - do not use premarket data
pullbacks - do not use premarket data
% up, down - do not use premarket data
standard deviation - do not use premarket data
crossed above, below open - do not use premarket data
sector breakout, breakdown, divergence - do not use premarket data
gaps - do not use premarket data
consolidation breaks - do not use premarket data
opening range breakout, breakdown - do not use premarket data
linear regression - do not use premarket data
upward, downward thrust - do not use premarket data
SMA cross - do not use premarket data
MACD - do not use premarket data
stochastic cross - do not use premarket data
candle recognition (doji, hammer, etc) - do not use premarket data
nr7 - do not use premarket data
wide range bar - do not use premarket data

FILTERS USING PREMARKET DATA

change x min - use premarket data
vol x - use premarket data
stocktwits rel - use premarket data
x min range - use premarket data
gap - use premarket data
decimal - use premarket data
position in range - use premarket data
standard deviation - use premarket data
vwap - use premarket data

FILTERS NOT USING PREMARKET DATA

position of open - do not use premarket data
consecutive candles - data frozen from yesterday until start of regular market session
today's range & range % - do not use premarket data
pivots - do not use premarket data but functions in the premarket
bollinger bands - use premarket data
SMA and moving averages - do not use premarket data
rel vol - do not use premarket data
options filters - do not use premarket data
