

How to install your laptop tray

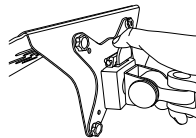

1

Place the laptop tray on the table, with the part containing the 8 holes perpendicular to the table and facing you, as indicated in the picture below.

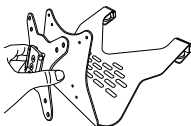

5

Lightly pull on the clip attached to the monitor arm to allow the laptop tray to slide into the monitor arm, as indicated in the picture below.

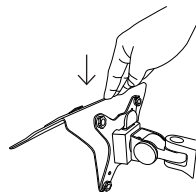

2

Place the assembly plate on the laptop tray aligning the holes on the plate to the laptop tray's holes. The word "TOP" on the assembly plate must be facing down.

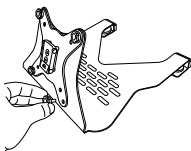

6

Push the laptop tray into the monitor arm to lock it into place. The clip should close and secure the laptop tray into the monitor arm.

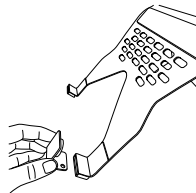

3

Secure the assembly plate to the laptop tray using the 4 screws provided by hand.

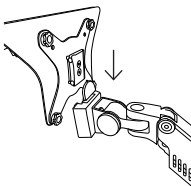

7

Then, pivot the arm so you are facing the laptop tray. Slide the L-clamps on each extremity of the laptop tray, as indicated in the picture below.

4

Align the laptop tray with the monitor stand, as indicated in the picture below.

8

Secure the L-clamps to the laptop tray by manually screwing in the 2 screws provided, as indicated in the picture below.
