## Step 1:

Start by removing the seat with a 5mm Allen wrench.

## Step 2:

Disconnect the positive terminal on the battery with a Phillips head screwdriver.  
Disconnect the negative terminal and remove battery.

## Step 3:

Disconnect the taillight and turn signal harness by releasing the retaining tab.  
Make sure to remember what wires are for what turn signals.

## Step 4:

Using a T30 Torx wrench, remove the rear fender by unscrewing the four mounting bolts.

## Step 5:

Install the British Customs Underplate with the supplied hardware using a 4mm Allen and 10mm socket wrench.

## Step 6:

Run the new taillight harness along the Underplate and mount it in position with the grommet.

## Step 7:

Loosely install the license plate mount with the supplied hardware. Make sure to place a washer between the Underplate and the license plate mount.

## Step 8:

Place the seat on the bike briefly to determine taillight placement.

## Step 9:

Tighten the license plate mount nuts with a 4mm Allen and 10mm socket wrench.

## Step 10:

Connect the taillight harness.

## Step 11:

Reinstall the battery. Reconnect the positive battery terminal with a Phillips head screwdriver. Reconnect the negative terminal. Remember to reset clock on dash.

## Step 12:

Check for proper taillight functionality.
