

## Release 3.7.14

Dated: February 2021

### Bug Fixes

#### Key Bugs Resolved:

1. A bug was occurring whereby a recurring batch SMS would not always schedule out in accordance the user-preference set timezone. The first message would send, and succeeding messages would not. This has been fixed.
2. A bug was occurring where the 'Sent' count for batch SMS reporting was always '0', despite the number of messages sent. This has been fixed.
3. "Keylink" feature was not an active feature for batch SMS. The "Keylink" field has now been removed to reflect this.
4. A bug was occurring whereby the conversational UI would reflect a scheduled message as a 'delivered' message. This has been fixed.
5. A bug was occasionally occurring when using the Safari browser whereby a duplicate message box, attachment button, and send button would appear for conversational UI. This has been fixed.
