

AMERICAN DEVON RECORD

VOLUME 9

The original of the American Devon Record Volume 9 used for this copy was provided by the American Milking Devon Cattle Association.

It was scanned by Lawrence Gilley during 2017 using a Cannon 8600F.

The optical character recognition (OCR) and editing were done by Lawrence Gilley during January - July 2018. The OCR software used was MeOCR v1.0. The resulting text was edited with Open Office Word. The PDF was created using pdfFactory 5.20.

The pagination is with a few exceptions the same as the original. Photographs from the original have been relocated at the end of the document.

Due to the process by which it was produced, this copy of Volume 9 undoubtedly contains errors which are not in the original.

PREFACE

We submit herewith, the ninth Volume of the American Devon Record containing the records of the registrations and transfers of pure bred Devon Cattle in this country from January 1, 1924 to July 15th 1937, together with a list of the Devon Bulls and Cows recorded in the Advanced Registry for milk and butter fat production.

The publication of this volume has been looked forward to with great anticipation by Devon breeders throughout the country and it gives us a genuine pleasure to make it available at this time. In publishing this volume it has seemed necessary to avoid all unnecessary expense and to keep the cost of publication within the limit of the Club's resources. For that reason, we have used a style of printing that is different and much less expensive than that used in the previous issues of the Herd Book, however, we trust that it will serve the purpose for which it is published equally well.

It seems appropriate to preface this volume by mentioning a few events that have transpired since the publication of Volume 8 that we believe will prove to be milestones in the History of the Development of the Breed in America.

In 1925 a consignment sale was held by the Club at the Eastern States Exposition in which ten animals were contributed as outright gifts from the following breeders: Batchelder Farms, Mont Vernon, N. H., Conn. State College, Storrs, Conn., John E. Gifford, Sutton, Mass. Case & Elling, Concordia, Missouri, Ralph Coffing, Macy, Ind., Dr. John L. Buel, Litchfield, Conn, The proceeds of this sale were used, to pay up all outstanding debts of the Club and provide funds to put it on a good financial footing.

In 1931 the American Devon Cattle Club cooperated with the United States Department of Agriculture in establishing a Devon Herd at the Everglades Experiment Station of the University of Florida at Belle Glade, Fla. This Herd has since been added to from time to time and has already proven a vital factor in establishing Devon Herds throughout Florida and neighboring states.

There have been more importations from England during the last few years than in any similar period since 1890. These cattle have been widely distributed over the country and have already made a tremendous contribution to the advancement of the Breed.

Although a complete account of these cattle appears under their registry record we mention here the dates of importations and the names of those enterprising breeders who brought these cattle over:

- 1929, Batchelder Farms, Mont Vernon, N. H.
- 1929, Case & Elling, Concordia, Mo.
- 1929, W. H. Neal & Son, Meredith, N. H.
- 1929, John E. Marble, So. Pasadena, Calif.
- 1929, W. E. Gird, Bonsall, Calif.
- 1929, Mark J. Hammett, Landover, Md.
- 1930, Wayside Inn, So. Sudbury, Mass.

We also acknowledge and express our appreciation for the financial assistance given toward the publication of this volume by those who have pictures of their animals appearing herein, and to Mr. John E. Gifford, Sutton, Mass. and Mr. John E. Marble, South Pasadena, Calif., and also acknowledge the picture "Landing of Devon Cattle in Massachusetts" as the gift of Swift & Co. of Chicago.

In conclusion we may say that since Volume 8 was published there has been a gratifying expansion of the breed throughout the country which would have been even greater had there been more good cattle available to supply the demand.

W. J. Neal

Secretary

ADVANCE REGISTRY SECTION

REQUIREMENTS FOR BULLS

Any registered Devon bull having two daughters from different cows, that have successfully passed advanced registry requirements, shall be entered in the list of advanced registry animals.

REQUIREMENTS FOR COWS

CLASS A -- If the record is commenced the day the animal is two years of age or previous to that day, she must produce 250.5 pounds of butter fat. For each day the animal is over two years, at the beginning of her year's record, there shall be added one-tenth of a pound per day to determine the amount of butter fat she shall be required to produce. This rate of increase, shall continue until the animal is five years old, when the requirements for that age shall be 360 pounds of butter fat.

CLASS AA -- If a cow in Class A carries a calf 265 days she shall be considered in Class AA.

CLASS B -- Cows must carry a calf 265 days during the testing period. Starting at two years, must make 5,905 pounds of milk. Add one pound for each day test starts after two years, until five years of age, when requirements are 7,000 pounds of milk. This class may be without outside supervision; but in such cases the record must be over the signature of the owner or manager and sworn to before a Justice of the Peace or a Notary Public.

CLASS BB -- If a cow fulfills the requirements of Class B, and starting at two years of age makes 190.5 pounds of butter fat, increasing the requirement one-tenth of a pound of butter fat each day until five years of age, when 800 pounds of butter is required, the animal shall be considered in Class BB. This class must be under the same supervision as Class A.

Tests made under supervision of an Agricultural Experiment Station, Agricultural College or School, County Agent, Cow Testing Association, or other agency shall be accepted, provided the supervision has the approval of the Executive Committee of the American Devon Cattle Club.
