Applying Cybersecurity to Personal Security

With David Piro

As cyberattacks increase, a lingering question continues, how can I be more secure? Professor Piro examines software, hardware, and practices for increasing the best cybersecurity practices at home. Looking closer at what mobile applications we use, what precautions do we have installed, and whom do we contact in the event of a crisis? Take a quick look at what devices, applications, and habits are recommended today.

Professor Piro currently works full-time for Florida SouthWestern State College as a full-time professor and as an adjunct instructor with Hodges University. He currently holds a Master's in Computer Science from Colorado Technical University, a Bachelor's of Science in Software Engineering, and a Bachelor's of Arts and Sciences in Philosophy from Florida Gulf Coast University. He is currently working on his Doctoral Degree in Cybersecurity and serves as a member of many community groups and co-leads Southwest Florida Security Group and OWASP Bonita Springs.
