## Postsecondary Attainment | Supporting Access and Completion for Adult Learners

Old Dominion  
University

Virginia’s adult learners represent an important target audience for increasing credentialing, but they face a wide range of challenges when returning to a postsecondary setting. Further, adult learners experience higher education differently than traditional students, as adult learners often have full-time jobs, children, or dependents for whom they are responsible. As such, additional pathways to completion, such as short-term credentialing and career and technical education may support adult learners on their postsecondary journey.
