

# WELCOME TO HOMEBIOTIC!

Over the past 20+ years, overuse of antiseptic cleansers have caused the loss of up to 90% of the **beneficial microbes** naturally found in our homes. This imbalance lets **harmful microbes** move in where they are now free to grow unchecked.

Homebiotic helps **restore** this delicate balance by re-introducing the beneficial soil microbes that act as a **living defense** for your home.

Now you can rebuild the **natural immune system** your home needs.

*“Your home is a petri dish whether you like it or not, but you CAN change what grows in it!” - Dave Asprey*

PROBIOTICS FOR YOUR HOME

QUICK START GUIDE

## HOW HOMEBIOTIC WORKS

In an ideal *balanced* environment, **good** microbes exist alongside **bad** microbes to keep them from growing out of control.

With overuse of chemicals, most of the microbes are wiped out, but the **bad** ones return and start to re-grow right away.

This soon creates an *unbalanced* environment that is mostly **bad** microbes, which allow **mold spores** to begin growing too. Uh oh!

With Homebiotic, **good** microbes compete with **bad** microbes for space and food. They also **actively block** mold spore growth. Balance!

## REMOVE MOLD BEFORE USE

Homebiotic **prevents** new mold growth, so any existing mold should be removed before use.

Although frequently recommended, bleach is **not effective** for cleaning mold from *porous* surfaces (wood, walls, etc) and it can actually make a mold situation even **worse** over time! Oops!

**For cleaning mold on *hard* surfaces you need:**

HYDROGEN PEROXIDE

RUBBER GLOVES

FACE MASK & GOGGLES

Spray or wipe affected area with hydrogen peroxide (3% - 7% concentration). Let it sit on the mold spots for 5 minutes or until it stops foaming. Wipe clean with a disposable cloth or sponge to remove mold residue and allow to fully dry. Repeat process until mold is removed.

**For cleaning mold on *soft* materials you need:**

BORAX POWDER

RUBBER GLOVES

SOAKING CONTAINER

Mix 1/2 cup borax powder per 1 gallon of warm water, and fully soak materials for 2-4 hours. Launder as usual, repeat process if spots or musty odor persists.

## HOW TO USE HOMEBIOTIC

**To use Homebiotic you need:**

HOME BIOTIC

HEALTHY CLEANSERS

THAT'S ALL!

After cleaning each target area as usual, spray a fine mist of Homebiotic over the surface. Let air dry.

**FIRST TIME:** Spray each area **once daily** for 7 days to help the new microbiome get established.

**MAINTENANCE:** Re-apply weekly, or as the last step of your *regular home cleaning routine*.

**Where to use Homebiotic:**

Apply Homebiotic anywhere you may have mold growth or musty odors. Common areas include:

- UNDER SINKS
- AIR CONDITIONER
- IN CABINETS
- IN YOUR SHOWER
- AROUND DOORS
- IN YOUR BASEMENT
- AROUND WINDOWS
- IN YOUR VEHICLE
- IN WASHING MACHINE
- CARPETS NEAR DOORS

**NOTE:** Frequently wet or cleaned areas such as showers and washing machines will require re-applications after each use, as the Homebiotic will have been washed off.

**Where & How to store Homebiotic:**

Homebiotic can be safely stored with other home cleaning products. Keep out of direct sunlight, and do not allow to freeze. Homebiotic is stable at room temperature, but it should not exceed **105°F (40°C)**.
