

BALI PLEATED SHADES

Care

The following cleaning instructions have been developed for the fabric used in pleated shades.

Remove the pleated shade from the window, open the shade and lay it out on a clean, flat surface, such as a counter or table top.

If the shade is dusty, simply vacuum over it using an upholstery attachment.

For cleaning fingerprints or soiled spots on pleated shades, we recommend using an aerosol spray foam upholstery or fabric cleaner, such as Woolite™ or ScotchGard™ upholstery cleaners.

Spray the foam cleaner over the entire areas to be cleaned. Immediately scrub the area with a clean, damp sponge (back and forth gently in the direction parallel to the pleats in the fabric) until the stains are removed. If necessary, the entire shade may be cleaned in this fashion. Be careful not to crush or wrinkle the fabric.

Remove the excess water from the fabric by patting with a clean, dry towel. Hang the shade up when completely dry.

Frequent cleaning may tend to remove the fullness and body of the pleated fabric.

Due to the differences in Ultrasonic cleaning operations, we cannot recommend this method of cleaning.

Do not use strong detergents or spot removers.
