

THEMATIC SECTION

Regenerative and Intelligent Pathways toward the Twin Transition in Industrial Engineering and Operations Management: Driving Responsible Production and Consumption through Systemic Circularity and Interconnected Value Ecosystems

Journal	Production
Linked event	XXXIII IJCIEOM 2027 – International Joint Conference on Industrial Engineering and Operations Management
Conference	PUC-Rio, Rio de Janeiro, Brazil 14–16 June 2027
Submission deadline	30 November 2026

Guest Editorial Team

Rafael Garcia Barbastefano — CEFET-RJ, Brazil

Osvaldo Luiz Gonçalves Quelhas — UFF, Brazil

João Carlos Gonçalves dos Reis — Lusófona University, Portugal

Luiz Felipe Scavarda — PUC-Rio, Brazil

Proposal summary

The proposed Thematic Section examines how digitalization and sustainability can be jointly operationalized through circular, regenerative and human-centered production systems and through interconnected value ecosystems. It seeks rigorous theoretical, empirical, methodological and applied contributions in Operations Management and Production Engineering, with particular emphasis on responsible production and consumption, circularity, resilience, digital intelligence, and evidence-based decision support.

Editorial milestone

Final decision for conference-linked papers: 21 April 2027

Publication: continuous flow after final acceptance and production processing

Prepared in accordance with the Production Thematic Section proposal template.
