PROGRAMABLE LED LIGHTING

IN-SHOP MANUFACTURING

The large overhead beam structure was fabricated, pre-assembled, and tested in-shop prior to the onsite implementation. This ensured the best impact for the integrated color-changing LED lighting, and the highest overall quality and “Wow”.

FINISHES

VGT LOUNGE

BEFORE

AFTER

An under-utilized lounge area was completely transformed to create the new “VGT Lounge” gaming area. The space features an overhead curving soffit structure with integrated LED lighting to create a soft, ever changing ambiance.

OBJECTIVE

The new design for the Buffalo Grill and Lounge combined rustic and aged finishes with modern decor to create a comfortable, warm, and high quality environment. Drawing inspiration from the local region and natural surroundings helped to make this dining establishment a destination of it's own for guests to unwind and enjoy the daily fare.

LIGHTING

Custom chandeliers with warm diffusers create a soft glow in the dining area.

ART

Unique buffalo imagery surround the Grill to create visual interest, while adding to the color palette and overall theme of the venue.

A UNIQUE ENVIRONMENT

Ghosted images of iconic Oklahoma culture are overlaid on an aged brick texture to create a one-of-a-kind wall mural, amplifying the rustic aesthetic of the Buffalo Lounge.
