## 13 Certified Cloud Security Professional Program

**Duration:**

150 hours

### Program Description:

The Certified Cloud Security Professional (CCSP) program is a comprehensive training that delves deep into the world of cloud security, providing students with an understanding of principles, tools, techniques, and technologies. The program is designed for IT professionals looking to specialize in cloud security, covering areas like threat intelligence, cloud security architecture, design, operations, and service orchestration. This program will also explore emerging trends and future developments in cloud security, preparing students for the rapidly evolving landscape of cloud computing.

**Successful completion of all the below modules is necessary to earn the CCSP credential.**

#### 1301 Introduction to Offensive Security

- Duration: 15 Hours

#### 1302 Essential Offensive Security Tools

- Duration: 30 Hours

#### 1303 Penetration Testing & Vulnerability Assessments

- Duration: 30 Hours

#### 1304 Web Application Attacks

- Duration: 25 Hours

#### 1305 Network and System Exploitation

- Duration: 20 Hours

#### 1306 Post-Exploitation Techniques

- Duration: 20 Hours

#### 1307 Future Developments in Offensive Security

- Duration: 10 Hours

#### 1308 Offensive Security Capstone

- Duration: 10 Hours
