

CASEMENT WINDOWS

With a unique design that features a side-hinge and a hand crank to open, our casement windows offer the perfect blend of aesthetic appeal and ease of use. Crafted using our Tricore™ Frame Technology, casement windows provide exceptional energy efficiency and come in finish options to perfect the look of your home.

Unmatched Performance

Tricore™ Frame Technology features extruded aluminum exterior cladding that's easy to maintain and stands up to the harshest elements. With corners welded to prevent water penetration, the multi-chambered composite sub-frame is not only impervious to moisture, but also acts as a thermal barrier.

Refined Security

The **concealed lock system** provides a clean appearance with a single lever lock that engages all lock points on the sash.

Function and Form

The effortless operation of our all-metal nested crank handle is the perfect complement to its **sleek, rounded design**. Because the handle folds neatly into place, it won't interfere with window coverings or draperies. The clever design also allows for the cover to be removed and replaced when painting or staining.

High Quality Exteriors

Our aluminum exterior-clad wood products feature **commercial-grade premium AAMA 2605 paint** that resists fading and chalking. Extruded aluminum resists dents, dings and scratches and is backed by Weather Shield's 20-year limited warranty.

Lasting Design

Integral nailing fins increase stability and help seal the unit to the structure, providing superior performance and durability.

Genuine **solid wood interiors** can be factory finished and come ready to be stained or painted.
