DYNAMO

PIONEERING PLAY

Join us on a magical journey!

DYNAMO PLAYGROUNDS

ANYTHING BUT ORDINARY

Dynamo is the world leader in innovative playground equipment.

Our stunning designs and masterful engineering ensure that every piece we build inspires the imagination of children everywhere.

And, we haven't even started yet! Dynamo's new and future projects always involve burrowing further down the rabbit hole, so look no further for your next custom project.

Our playgrounds always hold hours of fun for children of all ages, complete with Ropes Courses, swings, spinners, slides, and more. Your park will be thriving with more children and families than any other typical playground.

With our innovative technology, we will manifest your dreams into reality. Children in your community will want to play long after the sun goes down.

Let us get inspired together, and bring out the creativity in everyone with a Dynamo Playground.

Play Matters.

OUR PROMISE TO YOU

RICHARD MARTIN
CEO & Founder

While kids want to have fun, parents want them to be safe, and communities want to know they are making the best choices they can. Every single person on the Dynamo team is completely committed to meeting these expectations. Our structures fuel laughter and imagination, but they are also the safest in the world. Their beauty, legendary durability and complete compliance to CSA, ASTM, EN standards, and IPEMA & TUV certification, make them right for every park setting.

Try them! Come and play! Then you'll know!

When we look back at the playgrounds of our youth, we often wonder where all the fun went. Even though we remember the thrills and the endless hours of enjoyment, much of the equipment we played on doesn't meet modern safety standards. The Dynamo team has gone to great lengths to make sure our children know the joy we lived when we were their age, but safely.

Our Apollo, Allegro and Astro structures bring back the spinning sensation of the merry-go-round, but use revolutionary technology to limit rotational speed and the use of our unique ropes instead of steel makes them completely safe. We've even improved on the traditional swing! Our Biggo swing can be shared with three friends safely, protected by Dynamo's industry-changing safety bumper. After all, laughter is meant to be shared, and real fun is contagious.

ABOUT US

For a quarter century, we've produced revolutionary designs that promise to deliver real adventure and excitement that fuels the children's 'Ship of Imagination'.

Rope rockets that are out of this world, Mast Nets that reach the stars, Biggo swings that let you travel through space on flying saucers, and our Ropes Courses which are runways to the next galaxy of creations, as Dynamo Playgrounds reignites the playground universe.

Never confined by playground industry norms, the team at Dynamo took the lead and created a new standard of entertainment for children with our free form, artistic innovations.

A new generation of revolutionary designs, meticulous attention to detail and a global search for the finest materials and methods have come together to create today's safest, most durable parks and playgrounds.

Dynamo Playgrounds stands apart from the rest, because Play Matters to us.

PLAY VALUE

True play value has many factors. High user capacity with less space & materials used than traditional designs, universal availability in each structure, and long-term durability are only a few examples.

Play Attraction

Our exciting games will appeal to children of all ages, from preschool to teens, and crowds of them. You won't believe how many kids will come when you open your new Dynamo-inspired playground!

Play Retention

Getting the children to stay outside and play is never a problem with our active and inclusive game designs. More fun than a virtual world, they will stay engaged for hours. Your only problem may be getting them home for supper.

Play Return

Kids can be fickle, but we guarantee children will want to go back and play on our Dynamo playgrounds again and again. Buyers of our playground equipment will always receive fantastic value for their investment.

DYNAMO ROPE

Dynamo's engineers have created the safest, longest-lasting, most attractive cabling in the playground industry.

Using proprietary technology, we have infused beautiful nylon or polyester cable coatings with UV protectants and flame retardant solutions in the extrusion process. We use these vibrant threads to weave a braid around at least 144 strands of galvanized steel to produce the play structure rope.

This unique process keeps the ropes beautiful to see, soft to touch and stronger than any other cabling available.

The vibrant colours will immediately appeal to children of all ages, but the ropes will also feel just as good to the touch.

A class 8 UV Colourfastness rating keeps the ropes looking new and the special nylon formula and unique weaving of threads means that Dynamo Ropes are resistant to fading, wearing and fraying for years.

DX CONNECTORS

Dynamo's metal junctions are the magic that enables Dynamo designers to create our ever-growing collection of unrivalled play structures.

The team examined every possible variation of plastic and steel connector, but many used connecting screws and pins that ultimately damaged the ropes in time.

This exhaustive search resulted in the creation of the DX system of moulded high-density aluminum.

Compressing with 120 tons of force gives them incredible strength and a beautifully smooth finish.

This system eliminates any risk of friction at connection points and ensures that the rope's integrity and longevity are never compromised.

Dynamo even created a portable machine press that can be used to repair a structure on site in the rare case of extreme damage.

NATURE'S AURA

The Warmth Of Wood

These games feature creative designs and dynamic climbing challenges!

They also bring the warmth of wood & emotional connection with nature to the playground without sacrificing crucial elements like safety, durability or design options.

Black Spruce

Our Nature's Aura products are made with Black Spruce which is known for its excellent hardness rating and greater green impact.

Thermal Normalization Properties

Wood structures have thermal normalization properties.

This is an essential feature that is growing in importance for children everywhere, and crucial in certain regions and climates that regularly experience extreme temperatures.

INNOVATIVE WAY TO PLAY

***Dynamo
Exclusive***

Our Nature's Aura line uses high-quality glued laminated beams for main structural beams which have consistent characteristics and trustworthy structural properties.

Inspired by nature, our Nature's Aura products are designed to be strong, dependable, and inviting for children of all ages.

Come and explore our Nature's Aura product line and bring the warmth of nature to your community!

OVNI TRACK RIDE

The Ovni Track Ride is a multi-user and inclusive game that is sure to turn heads and put your park on the map.

Our Famous Biggo Seat

With the implementation of our Biggo seat, we have created a multi-user and inclusive game that is sure to turn heads and put your park on the map. Our Biggo seat is fully accessible and can be used by multiple children at a time. The dish-like seat conjures up shared images of soaring spaceships or flying carpets, all while helping children of all abilities develop their balance and enjoy some well-deserved and well-needed social interaction.

THEME PARK THRILLS + FUN

**Dynamo
Exclusive**

This innovative and monumental game features a unique design that allows the Biggo seat to return back to its original starting point all on its own. This means that no child is left at one end and there is no need to physically return the swing back to the beginning, allowing for less work and more play!

As with any Dynamo Playgrounds game, the Ovni Track Ride was designed with sustainability in mind. The structure is low maintenance and designed to be durable and long-lasting. We want to ensure that the children in your community can get as much play out of each of our games as possible.

We invite you to feel the thrills of a 100ft ride in your own community. Let's kick your playground up to the theme park level by including this fun and exhilarating new game!

CONLUDO

Our Conludo products bring creativity and vibrant colour to your neighbourhood.

Indoor & Outdoor Use

Designed for both indoor and outdoor use, the main body of the play units consist of a soft rubber coating adhered to a fibreglass shell.

This composition creates a safe user experience combined with a long product life.

**IT'S HOW WE
PLAY TOGETHER**

**All-New
Products**

Vandal-Resistant

The rubber coating is made from Ethylene Propylene Diene Rubber (EPDM) and Styrene Butadiene Rubber (SBR) pellets which are bound together creating a smooth unitary surface. The pellets are unified using an aliphatic polyurethane (PU) binder. The hollow fibreglass shell is manufactured to be vandal-resistant and strong.

Vibrant Colours

The vibrant colour schemes and playful graphics create an inviting addition to any play space. The colours are made to be UV stable, and capable of withstanding outdoor use.

Add a splash of colour and a hint of excitement to your play space with Conludo!

STURIA

LEWIS AND CLARK LANDING AT THE RIVERFRONT

Community at its Core

Get ready for an immensely fun and interactive play experience for the entire family.

Lewis And Clark Landing at the RiverFront is a vibrant community hub that fosters long-lasting friendships and collaborative play. Bring this magnificent playground to your city and give your community the ultimate play experience.

Built with durability in mind, this playground is equipped with weather-resistant materials, ensuring year-round enjoyment.

THE ULTIMATE PLAY EXPERIENCE

**Dynamo
Exclusive**

Each area is an artistic marvel, uniquely crafted and designed to ignite every child's imagination. All ages and abilities are invited to explore every corner of this seemingly endless world of amusement.

It Comes Alive at Night

The fun doesn't have to stop when the sun goes down! Thanks to the illuminated structures, Lewis And Clark Landing at the RiverFront is filled with well-lit areas for all to enjoy. Lighting is placed strategically to ensure a safe and enchanting adventure under the stars.

MODULAR PUMP TRACKS

Fun Around Every Turn

Get ready for non-stop action with our NEW Modular Pump Tracks!

Speed, excitement, and exhilarating momentum all on one never-ending track.

Different Configurations

Our Modular Pump Tracks come in a variety of configurations and module combinations, providing the perfect ride for the community you're aiming to serve.

The modular design means that setup is a simple and short task – most tracks bolt together in a few hours - and future maintenance is equally simplified.

Even more, you can easily re-configure the layout or incorporate additional modules to change up the design in the future to suit your needs.

NON-STOP ACTION

Modular Designs

Whether a rider is performing impressive stunts or simply cruising casually, our Modular Pump Tracks can be used by every age and skill level.

They help users work on their balance, coordination, and overall body strength all while promoting physical activity.

Our larger pump tracks have the ability to accommodate up to 50 people, making them a popular place for riders to hang out with friends and show off their latest tricks.

With our new Modular Pump Tracks, you're sure to experience exhilarating, fast-paced action around every twist and turn!

TRADITIONAL WITH A TWIST

BIGGO SWINGS

*The best things in life are shared, so Dynamo took
a traditional playground favourite and made
it even better.*

MULTI-USER

We created multi-user, multi-directional swings that give an unpredictable thrill with every turn!

We've made sure that our swings can be combined with traditional swings, using classic posts to add bays of buckets or belt swing seats.

They are built with an aluminum seat and a safety bumper encompassing the seat. This way, the seat doesn't get hot in the sun and also protects children from injuries.

With exciting swinging action, Dynamo's Biggo Swings offer incredible benefits with its world-leading, revolutionary design.

This includes universal access, appeal for all ages, and a safe experience for everyone.

Our goal is to work with you from start to finish, and beyond!

We're here to build the perfect playspace for your community by incorporating our award-winning products.

Come and get your share of thrills with our Biggo Swings!

IMAGINATIVE PLAY STRUCTURES

ROTATING CLIMBERS

*Spinning, climbing, laughing and working together:
our rotating climbers provide it all through several
whimsical models.*

WORLD FAMOUS

Our Rotating Climbers are extremely popular, innovative, and fun. This game allows children to discover their physical skills and abilities by climbing and spinning safely in complete 360-degree circles. And, best of all, there is room for everyone to ride!

At Dynamo Playgrounds, we love seeing kids play and take on challenges together. Our Rotating Climbers encourage group activity and inclusivity, no matter the age or ability.

Our Rotating Climbers are ADA accessible and feature a transfer deck that is perfect for reduced mobility users.

These games require low maintenance. They're also transparent, giving parents and caregivers a full view of their little ones at all times.

Our climbers are engineered to last with self lubricating nylon bearings. This incredible bearing system allows the deck to rotate but controls the speed at the same time to ensure the complete safety of the structure and all who are enjoying riding it!

UNIQUE ROPE CONSTRUCTION

FRAME NETS

Our frame nets transport kids anywhere their imagination can take them, all while exercising their balance, climbing and coordination.

3D EXPERIENCE

Frame Nets are the perfect complement to any playground design. Built on heavy gauge steel frames using Dynamo's unique rope construction, these games are the ideal place for children to practice their balance and climbing skills.

Designed to challenge your thinking, our Frame Nets provide a three-dimensional experience. Children are encouraged to sharpen their problem-solving skills as they must climb through the frames in order to play in the nets.

Frame Nets invite children to explore through the use of free play. The intricate net structure encourages critical thinking and is unlike anything you've seen before!

Our Frame Nets can be customized to include the addition of spinners, slides, rope bridges, panels, and pendulum steppers. This makes for a truly unique play experience.

Our Frame Nets transport children to anywhere their imagination will take them. These structures will allow generations of adventurers to complete their valiant quests.

A tall, blue, conical mast net structure stands in a park. The net is made of green ropes and is supported by a central blue pole. A person is climbing the net. The background shows a clear blue sky and some trees. The ground is a mix of green grass and a blue safety mat.

THE SKY REALLY IS THE LIMIT

MAST NETS

*Our Mast Nets continue to revolutionize
the look of playscapes around the world,
in a very big way.*

ULTRA-MODERN

With intricate geometric rope construction, our Mast Nets encourage children to think strategically while they play. We invite them to test their motor skills, balance, coordination and agility as they explore these sky-high structures.

Though these nets are tall, the staggered rope construction ensures that children do not fall far before another rope cell construction catches them. So, parents and caregivers can feel at ease while their young ones are climbing high in the sky!

We are committed to completing rigorous product testing and use premium quality materials. Our ropes are made up of galvanized steel strands and polyester cable coatings. They are long-lasting, flame retardant, and come in a variety of different colors.

Like many of our games, we can tailor our Mast Nets to meet your specific requirements along with any design goals you have in mind.

With a wide selection of products in varying sizes, Dynamo has a host of Mast Nets that are perfect for every playground.

ADVENTURE FOR LITTLE EXPLORERS

NATURE PLAY

*Our Nature Play series is perfect
for younger and intermediate climbers
to hone their skills.*

FULL OF DISCOVERY

Create an outdoor adventure for little explorers in the heart of your neighbourhood park with our GFRC stumps, logs, rocks, animals and more.

Challenging climbing trees where mystical creatures nest, or a hollowed out redwood tunnel, is the fuel for fantasy that makes childhood play so magical.

Our Nature Play series is perfect for younger and intermediate climbers to hone their skills.

Dynamo's Nature Play is a safe series of strong, natural, long-lasting playground structures made of GFRC that use the beauty of nature to inspire children to climb and explore.

These long-lasting structures can also be customized with rope, giving kids more areas of exciting exploration.

Imaginative and full of discovery, our Nature Play line is perfect for any playground.

A photograph of a playground featuring blue rope courses and net climbers. The equipment is set on a green safety mat. In the background, there is a building and a clear blue sky. The text is overlaid on the image.

LIMITLESS POSSIBILITIES

ROPES COURSES

*Innovative creations of free-form, multi-plane net
climbers that have limitless possibilities for hours
of amusement.*

MONUMENTAL

Our Ropes Courses offer a monumental play experience filled with limitless possibilities and hours of amusement.

These custom-designed ropes courses are innovative creations of free-form, multi-plane net climbers that are never the same play experience twice.

Unlike traditional playgrounds with defined play movement, Dynamo keeps everyone entertained with nets that twist, turn, rise and fall in complex connected paths.

These impressive structures attract kids of all ages and even adults, too! They help all users work on their balance, coordination and overall strength. Plus, they are a breathtaking addition to any community or destination playground.

All of our games are durable and built to last. With polyester rope fibers, galvanized or stainless-steel strands, and high-density aluminum connectors, we work hard to give you the best product possible.

Thanks to the industry-leading materials we use, our games experience less damage, vandalism, and general wear and tear.

LET YOUR IMAGINATION RUN WILD

CUSTOM CREATIONS

*Have you ever dreamt of a playground idea
and wanted to transform it into reality?
We can help you do just that!*

INNOVATION

We are continuously growing, innovating and modifying our playground equipment to challenge the ordinary concepts of outdoor play. If you can dream it, we will find a way to build it.

At Dynamo Playgrounds, we love to push boundaries and raise the bar with our one-of-a-kind designs. Our talented designers and engineers bring your concepts and visions to life.

With a combination of your ideas & sketches plus our expertise, we design a space that will make and keep kids excited about playing outside.

Behind every one of our parks stands the creative family at Dynamo. Whether it is a unique custom project or our next production item, we have plenty of ideas for you.

Come see what's possible when your creativity meets the team at Dynamo. We're making your dreams come true - one playground at a time!

STURDY AND INDESTRUCTIBLE

BASKETBALL SYSTEMS

*Save on space, not on fun with
our multi-armed basketball systems.
Bring the fun to a playground near you!*

SPACE-CONSCIOUS

Dynamo's multi-armed basketball systems are the perfect finishing touch to any park or schoolyard.

By incorporating space-conscious designs, our basketball nets maximize your basketball playing area.

Our nets are built in single, double, triple and quad formats. This means that there can be more than one game going at the same time, all in the same area.

As one of the most used pieces of equipment in schools, recreation centers and community parks, basketball nets are prone to more damage, needing to be replaced quite often.

At Dynamo, we've taken basketball nets and made them indestructible. We use the best materials to ensure our basketball nets are unbreakable. We even provide a lifetime warranty against vandalism.

Save on space, not on fun with our multi-armed basketball systems and bring the fun to a playground near you!

ENGINEERING + SAFETY

Innovation

Dynamo has become synonymous with industry leadership and innovation. As creators of the world-famous Biggo Swing, the Quad Pods and key structural components such as Dynamo's DX Technology; Dynamo is reinventing the way children play. Inspired by kids, their playground equipment is certain to light up the faces of children worldwide.

As a pioneer in the rope play industry, Dynamo is always seeking out new ways to bring fun and excitement to the playground environment.

Installation

Our equipment is designed with the installer in mind. Most of our products require far less on-site assembly than many 'traditional' structures. Some of our most popular items like Rotating Climbers and Classic Biggo Swing do not require concrete, a significant cost and time savings.

All of our products are delivered with comprehensive step-by-step instructions and diagrams to carefully explain the most efficient assembly process developed through our extensive experience with installing in playgrounds all around the world. Dynamo Playgrounds recommends that all equipment be installed by licensed playground installers, trained and certified on the relevant playground standards in place in the region of installation.

Maintenance & Repair

Dynamo's unique tamper-resistant connections make the structures virtually impervious to vandals. If ever one of these wonderful park creations does succumb to damage of any type, Dynamo has the ability to quickly and permanently repair it on site; returning it to "like new" condition.

Engineering

Engineered for the children of today and tomorrow, Dynamo products meet or exceed industry safety standards. Dynamo embraces the precious trust that has been given to them by everyone who plays on their structures. Every child must be completely safe, nothing less. Dynamo DX Connectors combined with DX Rope creates the strongest nets in the industry.

Dynamo's product lines are built to withstand the elements over time and will continue to surpass all expectations. Dynamo knows that no play structure can be too strong or too safe.

Quality

Playground equipment can never be "too" safe. So we create our products from the finest materials available anywhere. Dynamo DX technology uses the strongest ropes in the industry; with a minimum 144 strands of galvanized steel woven inside a unique nylon or polyester covering. We've also created a unique connecting system that uses compressed aluminum and stainless steel to make the structures even safer.

Our structures look and feel amazing to the touch, and will endure the most playful of children. That is the Dynamo quality.

DYNAMO INDUSTRIES

As a pioneer in the play industry, Dynamo is always seeking out new ways to bring fun and excitement to the playground environment.
