

CERACLAD Creativ Mural Program

The CERACLAD Creativ Mural Program offers artists, architects, and developers the opportunity to design and create large-format building murals on CERACLAD panels and installed during the standard siding installation process. Fast, safe, and seamless; Creativ Murals bring artistic and community visions to life while streamlining the construction process.

With mural designs pre-applied to the CERACLAD siding panels, installation is faster, easier, and more cost-effective—making art more accessible to all. Factory printing ensures consistent quality with no weather or paint concerns, so your mural looks perfect from the start.

Process

Phase 1 - Design

1. Simply provide an Adobe Illustrator image of your mural along with the required due date.

2. Provide Pantone Color Data

Deciding the colors

The Murals are printed using the Pantone colour fandeck. Choose your colours for your image in the Universal pantone selections.

- The process includes professional printed proofs that are send out for review on the Ceraclad panel material [Sample size 455mm x 285mm]
- Once samples are approved by the customer, the printshop will start their next process

3. Finalizing the mural panel grid layout in both horizontal and vertical directions to fit field conditions

Finalizing the Mural layout

Ceraclad provides technical assistance to assist with field fit conditions. We support you in the design process.

4. Production
