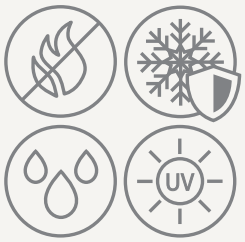
Hundreds of Cladding Design Options

CERACLAD
Triple-Coated Rainscreen Siding Systems

Superior Cladding Solutions for Sustainable Buildings and a Healthy Living Environment

1. Design Versatility

2. High Performance



3. Moisture Management

4. Cost Effective

5. Eco-Friendly

Primary Benefits

Virtually Unlimited Design Options

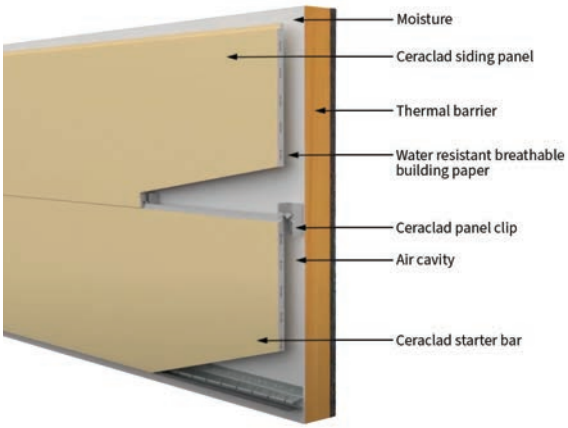
Design to match your unique aesthetic with our customizable panels, available in dimensions of L: 10' (3030mm) × W: 18" (455mm) × T: 5/8" (16mm). These adaptable modules can be cut to any length on site, combined in various colors, and installed in both horizontal and vertical orientations. Whether you prefer stack bond, running bond, or other layout patterns, our flexible design options are tailored to bring your vision to life.

Reliable Product Quality

Our products are made to perform in any climate. CERACLAD panels come with a 30-year Product Warranty and a 20-year Finish Warranty. Featuring a triple coating that includes ceramic and photocatalytic layers, they offer exceptional color stability and self-cleaning properties for long-lasting vibrancy. Certified for freeze-thaw durability, as well as fire and wind resistance, our panels meet rigorous standards in both the US and Canada.

Durable and Healthy System

Our integrated Rain Screen System promotes ventilation behind the cladding, helping to prevent mold and algae growth, ensuring a safer and more durable building.



Clear Pricing Package

Our transparent pricing system offers a standard rate for all textures, eliminating the need for off-site fabrication or shop drawings. Our caulk-free installation process reduces both costs and time. Plus, with our color warranty and self-cleaning technology, you can minimize maintenance expenses and maximize your return on investment.

Environmentally Friendly Product

Our panels are made from approximately 45% recycled materials and come with independently verified Health Product Declaration (HPD) and Environmental Product Declaration (EPD) statements. Additionally, we are committed to achieving zero carbon emissions by 2050, working towards becoming the most eco-friendly fiber cement siding available.

DESIGN OPTIONS

CERACLAD siding panels come in a wide range of rich textures and colors and provide you with hundreds of possible combinations. And our exclusive CREATIV® custom color program allows you to order your components in colors that will match your exact specifications.

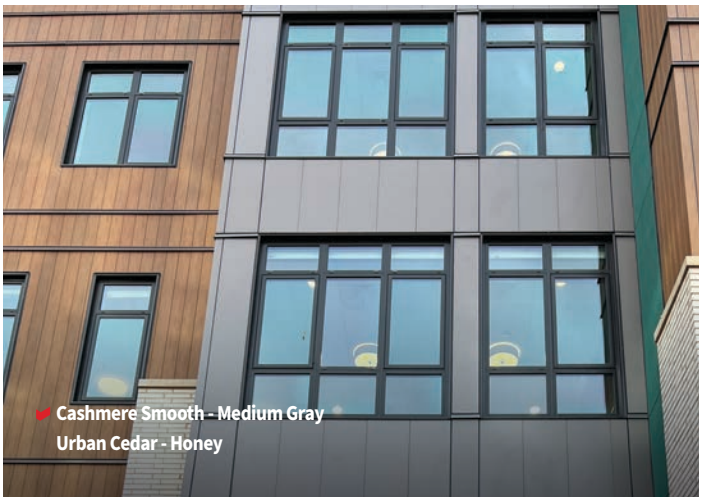
COMBINE TEXTURES FOR A UNIQUE LOOK

Creating a unique look for your properties is easier with Ceraclad panels since all our textures are available for the same price. Mix and match textures and colors to achieve a look that your brand can own. Talk to one of our sales representatives to learn more.

Cast Stripe - Mid Gray
Cashmere Smooth - Creativ Mural



Cashmere Smooth - Medium Gray
Urban Cedar - Honey

8 Reveal - Khaki
Contemporary Smooth - Black bean

More Colors

CREATIV®
2-COAT FINISH CUSTOM COLOR

Our patterns — your flair for color.

CREATIV®, CERACLAD's custom color program brings you nearly unlimited color options.

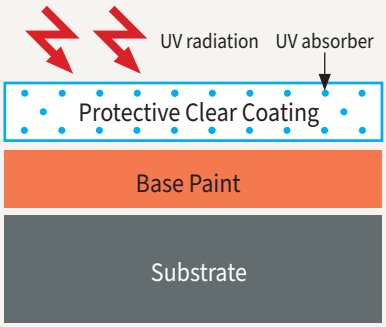
We keep those colors true with two factory-applied finish coats to protect **CERACLAD CREATIV** panels from damaging ultraviolet rays.

LEARN MORE AT CERACLAD.COM

CUSTOM COLOR COATING ✓CREATIV™ PANELS

Choose your unique color with our CREATIV custom color program. CERACLAD CREATIV panels feature a color coat followed by a protective clear coat, shielding them from ultraviolet rays and minimizing exterior discoloration. Unlike other custom color products that use only one color coat, our extra layer of protection reduces or eliminates the need for repainting, thereby lowering maintenance costs. Our proprietary colors and clear coatings are factory-applied to ensure superior quality, with two finish coats to help prevent fading.

SECTIONAL VIEW OF CUSTOM COLOR PANEL



The ultraviolet absorber layer prevents the penetration of ultraviolet rays into the colored layer.

BASIC SPECIFICATIONS	
Panel Type	Solid-Core
Application Method	Horizontal
Joint Type	Caulk Free
Coating Options	Triple Coated (6 colors)
Dimensions (Nominal)	W: 18” (455 mm) L: 10’ (3030 mm) T: 5/8” (16 mm)
Coverage	15 ft² (1.38 m²)
Weight	55 lb. (25 kg)

The Triple Coating is super weather resistant, low maintenance, and backed by a 20-year fade limited warranty.

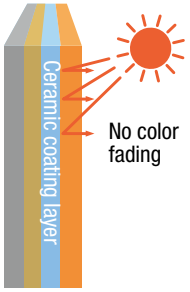
PRODUCT AND FINISH WARRANTY

CERAMIC COATING

30 YEARS Product
20 YEARS Color-Fade
WARRANTY

CERACLAD's inorganic ceramic coating has excellent UV blocking properties to protect the color layer from ultraviolet rays and minimize fading of the outer wall. Maintenance costs are reduced by virtually eliminating the need for repainting. This technology is exclusive to CERACLAD.



20-year Fade Limited Warranty

Meticulous Quality Checks Performed by Skilled Workers

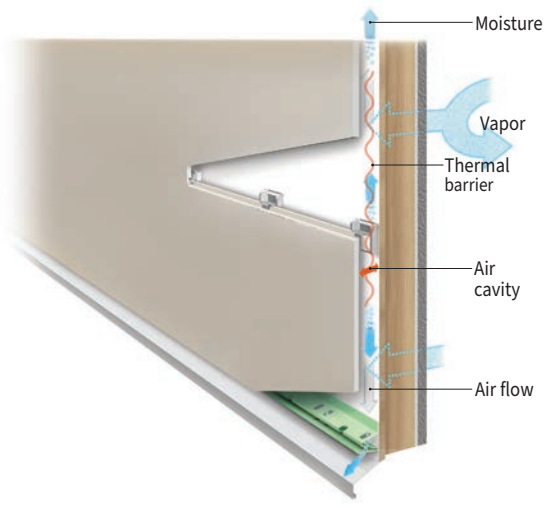
Even in automated manufacturing, we have skilled workers perform visual and assembly inspections where quality should be checked thoroughly. This process ensures high-quality production in a fast-paced environment.

RAINSCREEN MOISTURE MANAGEMENT

CERACLAD's Rainscreen Moisture Management System is an advanced wall assembly that incorporates proven rain-shielding technology. The system consists of pre-finished siding panels and innovative mounting clips and accessories that are manufactured and designed for durability and ease of installation.

Our exclusive technology combines a durable weather-resistant exterior with an internal ventilation layer that allows moisture to escape.

- Moisture management
- Air cavity
- Air flow
- Helps to prevent mold from growing



CLEAR PRICING PACKAGE

We have a clear pricing system with one-size, one-price, and one-stop shopping. Off-site fabrication/shop drawings are not required. Moreover, our Caulk-Free Installation System reduces cost and time. In addition, our color warranty and self-cleaning function minimize the maintenance cost and optimize the return on investment for customers.

COST AND VALUE COMPARISON CHART

PRICE RANGE	0 – 10 Years	15 – 25 Years	30 Years	PRODUCT FEATURE
High-end	**HPC Terracotta Hi-Density Fiber Cement Phenolic Panels** 10 yr / None	**ACM** 25 yr / None		**EUROPEAN** Design-Focused
Mid-range		**Mid-Density Fiber Cement** 15 yr / None	CERACLAD Triple-Coated Panels 30 yr Product Warranty 20 yr Color Fade Warranty	**JAPANESE** Quality and Design-Focused
Low-end	**3-Coat Stucco** None / None	**Pre-Finished Sheet Panel Pre-Finished Lap Siding** 15 yr / 3 yr		**AMERICAN** Price-Focused
	Product Warranty Length			
	Color Fade Warranty Length

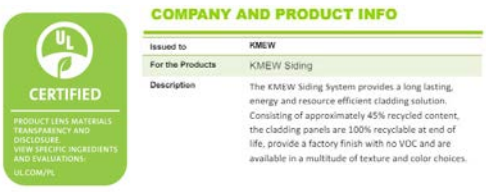
ECO-FRIENDLY PANELS

Our panels are crafted using approximately 45% recycled materials. We provide independently verified Health Product Declaration (HPD) and Environmental Product Declaration (EPD) statements, ensuring our products are eco-friendly and contribute positively to the local community.

EPD Hub VERIFIED ISO 14025

EPD Number: HUB-1313
Manufacture: KMEW
Validity Period: April 19, 2024 to April 19, 2029



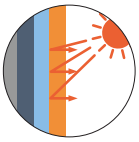
TRIPLE COATING TECHNOLOGY

1. Colored Layer

Factory finished, available in proprietary colors

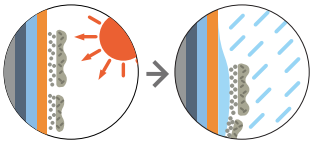
2. Ceramic Coating Layer

Excellent UV blocking properties, 20-year Fade Limited Warranty

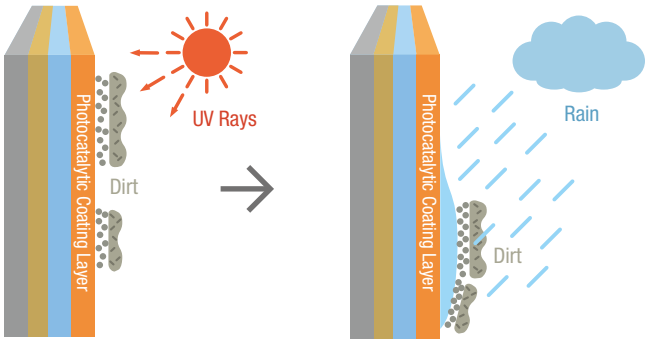


3. Photocatalytic Coating Layer

Self-Cleaning / Air-purifying / Anti-virus and Anti-bacterial



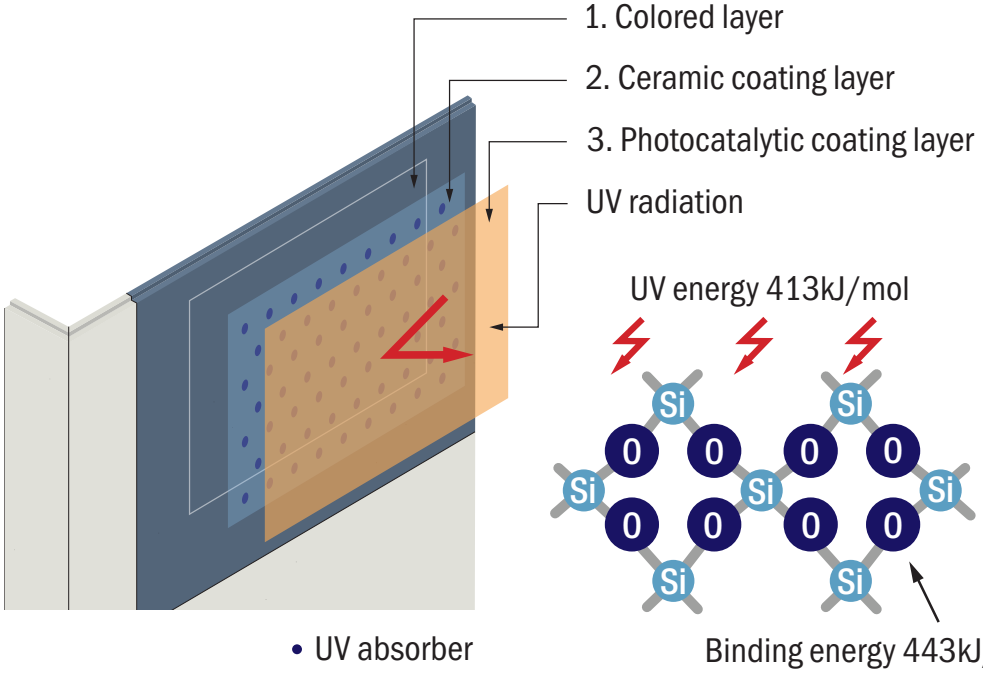
SELF-CLEANING 365 DAYS A YEAR



When exposed to sunlight, the Titanium Oxide layer breaks down dirt and reduces adherence.

The super-hydrophilic property helps rainwater penetrate under dirt, displaces it, and then washes it away.

Decomposition power + Super hydrophilic property



- UV absorber

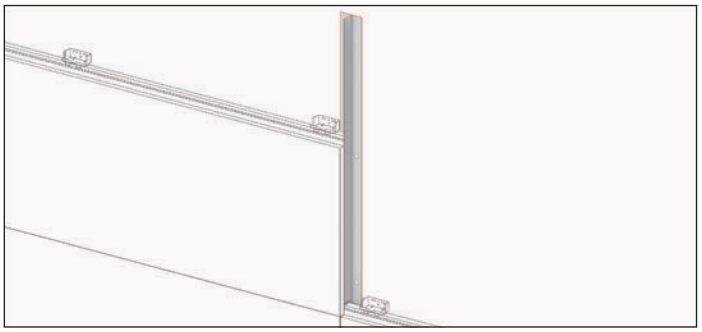
CERACLAD's T-joiner and L-joiner Eliminate the Need for Caulking, Achieving a Clean Sleek Surface in a More Economical Way

Caulk-Free T-joint

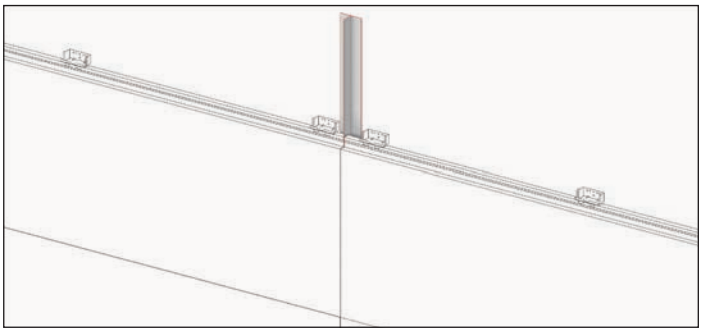
Conventional Caulk Joint

CERACLAD T-Joint Installation Quick Guide

Install the T-joiner butted to the panel and secure with screws every 16" o.c.; Install the panel clip so it does not overlap the T-joiner.



Continue to install panels butted to T-joint, fasten clips and repeat.



Installation Accessories				
Panel Clip	Corner Clip	Starter Bar	T-Joiner	Gasket Joiner
Wood/Steel Screw	Touch-up Paint	Spacer Block	Saw Blade	Waterproof Sealer

Panel Orientation

PANEL ORIENTATION

CERACLAD siding panels are designed to allow both horizontal and vertical application, providing greater design flexibility for architects. Installers will find that the innovative panel clip system makes installation easy and straightforward no matter which application is chosen.

Fire and Wind Certification

SUMMARY OF TEST METHODS

US
ASTME84
ASTME119
NFPA285
NFPA268

Canada
ULC- S101
ULC-S114
ULC-S135

FIRE RESISTANCE CHARACTERISTICS

CERACLAD panels have a Class 1 (A) Flame Spread Classification-0, Smoke Developed Classification-0 when tested in accordance with ASTM E84. Panels are Non-Combustible when tested in accordance with the Canadian Standard CAN ULC S114. CERACLAD has a tested wall assembly in compliance with the NFPA 285 standard, as well as an engineering judgment to allow polyisocyanurate exterior insulation and FRT wood framing as an equal alternate.

ASSEMBLY WIND RESISTANCE

ASTM E330 Standard Test Methods for determining structural performance of panels under uniform static air pressure difference. Strength Design values for transverse loads are available for the following combinations of wall assembly and CERACLAD assembly. Additional wind tested assemblies along with a full code compliance report from ICC can be found in ESR 1627.

CERACLAD **Panel Extruded**		
Wall Assembly	CERACLAD Assembly	Strength Design for Positive and Negative Transverse Loads
2×6 wood stud framing 16" o.c. with 1/2" plywood sheathing	Horizontal application 1-3/8" No. 8 screw per clip, clip placed 16" o.c. attached through plywood sheathing to wood stud	47 psf
2×4 wood stud framing 16" o.c. with 1/2" plywood sheathing	Vertical application 1-3/8" No. 8 screws 2 per clip attached into plywood sheathing	36 psf
18GA Steel Hat channel 17-7/8" o.c. attached to 18GA steel studs	Horizontal applications ¾" No. 8 screws 2 per clip, clip placed 16" o.c. attached to steal hat channel	41 psf
18GA Steel Hat channel 16" o.c. attached to 18GA steel studs	Vertical applications ¾" No. 8 screws 2 per clip, clip placed 16" o.c. attached to steal hat channel	38 psf
For SI: 1 inch=25.4mm, 1 foot=305mm, 1 PSF=47.88PA, 1 KSI=6.9,PA. For the latest performance values, please check the website at https://ceraclad.com.		

KMEW USA - OUR HERITAGE

KMEW was created as a subsidiary joint venture between two Japanese industry titans, **Panasonic** and **Kubota** Corporations. The CERACLAD Rainscreen Fiber Cement Siding System has a proven track record of performance nearing 40 years in Japan. Extensive research and technological advancement led to the development of the company's proprietary **Photocatalytic Ceramic Coating** which provides superior color retention and self-cleaning performance which eliminate costly maintenance.

Both photocatalytic and ceramic coating are applied at one of our factories in Japan to ensure consistent quality and improvement of our product.

OUR HISTORY

With our modest beginnings in North America in 2002, we began our journey providing attractive, high performance cladding systems designed for better living with a multifamily renovation in West Seattle. This first project introduced our cladding solution to the Pacific Northwest and still stands today as a testament to the superior quality and performance of the CERACLAD Rain Screen Cladding System.

Over the next 15 years, the CERACLAD brand grew into the market leading option for factory finished high performance fiber cement cladding. In the Spring of 2017, KMEW USA Inc. was formed and the CERACLAD cladding solution was introduced to the full North American market.

KMEW History of Technological Innovation

1989	1999	2002	2009	2017	2022
Established basic technologies of ceramic coating	Released ceramic coating to the market	Released photocatalytic coating to the market	Released photocatalytic ceramic coating with super hydrophilic property to the market	Further evolved performance of photocatalytic ceramic coating	Improved base materials and developed T-Joint Caulk Free System

CERACLAD Framework Toward Sustainable Growth

Every building has its own distinct design, and not all are bound by the same standards. Factors such as regional climate, cultural influences, economic considerations, and social priorities all shape the approach to green building. Sustainability has become a key benchmark for designers across various sectors, including offices, schools, hospitals, and residential spaces. While there are many elements that contribute to a "Green" building, we will highlight three that we believe are the most essential.

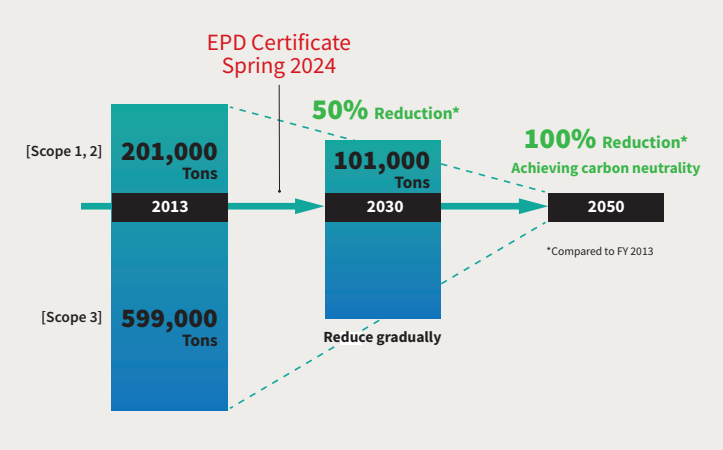
KMEW'S GREEN VISION ON TRACK TO NET ZERO

KMEW Japan is committed to reducing our product's net carbon emissions by 50% by 2030 and achieving net zero by 2050. KMEW USA/CERACLAD received our EPD Certificate in the Spring of 2024.

For Scope 1 and Scope 2, we will advance energy-saving initiatives across our factories and offices, including evaluating production processes to incorporate decarbonized energy.

Scope 3 will prioritize minimizing waste and disposal at job sites while developing low-carbon raw materials and products.

Lastly, KMEW Japan will focus on optimizing our logistics network to reduce emissions related to transportation, considering the distance to each site.



GREEN & RECYCLED MATERIAL

Our products consist of approximately 45% recycled material, the panels are 100% recyclable, factory finished with no VOC, and contain no asbestos. Fly ash and pulp are included as recycled materials, reducing resource consumption during production. In our manufacturing process, all discharged water is treated by the latest treatment technologies and recycled as much as possible.

LEED certified projects
HPD (Health Product Declaration) certified material

PRODUCT PROMISE

CERACLAD employs an advanced Triple Coated process in the manufacturing of our panels. This exceptional process grants our products a comprehensive warranty package, including a 20-year anti-fade warranty and an impressive 30-year product warranty. The ceramic seal, a key component of this process, acts as a robust shield against color fading caused by UV light exposure. Additionally, our final photocatalytic seal serves as a stalwart defender against dirt and grime adhesion to our panels. Working in synergy with UV rays and rain, this seal effectively dislodges and removes accumulated debris, ensuring that our panels maintain their pristine appearance, just as they did on the day of application.
