

Logo Circle Assignment

Due: Friday November 20, 2015

You've now had a variety of opportunities to measure the circumference, radius, and diameter of circular objects.

Must Haves:

For your final task you will create a circular Logo.

Your logo must have a radius of 7 cm.

You will have to solve the following using the Mathematical equations we have learned this unit:

- Diameter
- Circumference
- Area

In addition, your logo must be detailed and visually appealing.

Submission Requirements:

If you design a paper/hard copy, attach the above calculations to the back of your logo.

If you design the assignment electronically include the above calculations in the same document.

A short explanation of what your logo represents and why you choose it.
