

## Formula Fridays - Grade 5

Pick three numbers that are less than 100 000. Represent these numbers in more than one way. Order these numbers from least to greatest. How do you know that you're correct? Explain your thinking using pictures, numbers, and words.

Remember the three problem solving strategies that we learned this week:

1. Draw a diagram or picture.
2. Make an organized list.
3. Look for patterns.
