

Formula Fridays

December 6, 2013 (Due on December 13, 2013)

The answer to a mean question is 10. The answer to a median question is 10. The answer to a mode question is 10.

1) What are possible mean, median, and mode questions that could give you an answer of 10? Show your work and explain your thinking.

Challenge (If you wish to try it.): Is it possible that the same question could be used to show mean, median, and mode? Show your work and explain your thinking.
