

Formula Fridays

April 4th, 11th, and 25th (No homework on the 18th because of the long weekend.)

For Formula Fridays this month, I'd like students to have a look at the math question prompts on the Daily Shoot Blog Posts (these are the bolded questions that come at the end of the discussion on what we did in math): <http://missdunsiger.commonshwdsb.on.ca/category/daily-shoot/>.

Have your child pick one of these questions during the week, and discuss his/her thinking with you at home. Get your child to record his/her thinking and learning in some way (be it through a podcast, video, written explanation with calculations, screencasting tool, or other creative option) and share it with me.

- Your child can share it on his/her blog.
- Share it with me through GoogleDocs. (My GoogleDocs email is adunsige@hwdsb.on.ca.)
- Email it to me. My new email address is adunsige@hwdsb.on.ca.
- Bring me in a paper copy of the work.
- Tweet it to me at @avivaloca.
- Share it with me in any other way that he/she wants.

If your child would still benefit from some multiplication or division review, he/she can also choose to substitute this activity with one of the last two Formula Friday ones:

<http://missdunsiger.commonshwdsb.on.ca/files/2013/08/Formula-Fridays-Week-16.pdf> or <http://missdunsiger.commonshwdsb.on.ca/wp-content/blogs.dir/3156/files/2013/08/Formula-Fridays-Week-17.pdf>.

My plan is to tweet out some of the learning that the children share – *so that others can think and learn from your child's explanations* – but also use some of the work samples to further our discussions in class. If you have any questions about this, please let me know.
