

Formula Fridays - Grade 5

For math this week, students are asked to complete different number pattern problems on Prodigy (www.prodigygame.com). I emailed you the individual usernames and passwords during the Thanksgiving long weekend. If you need this information again, please let me know (aviva.dunsiger@hwdsb.on.ca).

Have your child login to the game, and he/she has been assigned seven different number pattern questions. Your child needs to not only answer these questions on the computer, but use paper, a device, or some other creative way to show me his/her thinking for at least five of the questions. Your child can either bring in this work by **Friday, November 1st**, or email it to me at aviva.dunsiger@hwdsb.on.ca. Your child may even want to discuss his/her thinking on his/her blog.
