

A Solid Or A Liquid

Dear Parents,

In Science, the Grade 5 students are learning about different states of matter (i.e., solids, liquids, and gases). As an introduction to this unit, I'm asking all Grade 5's to bring in an object that is either a solid or a liquid (or possibly even both). **Please make sure that these objects are not breakable. Label all items that you send in, and I will send them home at the end of the week.** Students are going to be using these real items to help uncover some of the properties of solids and liquids. Please send in all items by **Wednesday, September 4th**.

If you have any questions about this activity, please just let me know. You can call me at the school at **(905) 304-3255** or email me at **aviva.dunsiger@hwdsb.on.ca**.

Thanks for your help with this!

Sorting Socks

Dear Parents,

In Science, the Grade 6 students are learning about biodiversity. To help the students better understand the classification system, they're going to do some classifying of their own. To help with this, can you please send in **4-6 random socks (they do not need to be pairs)?** If you label them, I'll make sure to return them to you by the end of the week. Please send in all socks by **Wednesday, September 4th**.

If you have any questions about this activity, please just let me know. You can call me at the school at **(905) 304-3255** or email me at **aviva.dunsiger@hwdsb.on.ca**.
