11.2 Experimental Probability (also called relative frequency)

Learning goal = To determine probability from experiments

BIRTHDAY MONTH	TALLY	FREQUENCY	RELATIVE FREQUENCY= # of times outcome occurs # of times experiment is conducted	DECIMAL and % ANSWERS
January		3	3 / 30	0.1 or 10%
February				
March				
April				
May				
June				
July				
August				
September				
October				
November				
December				

RELATIVE FREQUENCY=
of times outcome occurs
of times experiment is conducted
