

Q & A Session

28th June 2018

1. Please can you explain the use of;

‘That’s Right’ and ‘That’s Good’

What is the aim and how best to use it, and not over use it?

2. I wanted to ask if hypnotherapy can help with COPD.
Thank you

Chronic Obstructive Pulmonary Disease

3.

could we discuss the extent hypnotherapy can be used to treat various conditions. From watching Marisa Peer videos on You Tube, it is evident that she is happy to assert that she can treat conditions such as eye sight, pregnancy/fertility and even cancer. I note that Andrew is happy to quote IBS as a physical condition that can be treated but where does he stand on the rest?

Thanks

4 .

I'm at the start of module 4 and would welcome something more developed than the written word in the module - I can see that getting this right will be pivotal to getting good results. Could Andrew do a tutorial on it please?

5. Hi Andrew

I'm addressing this to you as Vanessa is recovering from her medical emergency. (Hope she is doing well).

So, Fluid Questioning!

I totally get it and it's purpose but, for the practice on **Clean Language ONLY**, as per set exercise, (not Natural Clean language), having spent forever looking at the David Grove examples, well, it makes no sense to me what/how to ask!

So if I wanted the topic to be about weight loss, this is how it would look?

(And) what kind of weight loss (is that weight loss)?

(And) is there anything else about weight loss?

(And) where is weight loss? or (And) whereabouts is weight loss?

Please can you explain in another way what you are looking for?
