

Simulator Education eLearning Packages

Training Solutions by iTeachU

iTeachU have developed a low cost educational solution that combines simulator eLearning with high fidelity ultrasound simulators for physicians, surgeons, registrars and resident medical officers. The courses provide a good knowledge-base with practical components.

These courses can be easily implemented within any institution who have access to a Vimedix simulator and wish to conduct their own simulator courses.

The course package includes train the trainer tutorials on how to conduct the three-hour workshop as well as information on what is required to run the simulator courses.

iTeachU can develop other customised courses if required.

UltraScan iTeachU Simulator Courses

Focused Cardiac Ultrasound (FCU)

FCU is a limited echocardiography study, performed by the treating clinician to answer clinical questions in real time. It is also known as "Point-of-Care, Limited or Bedside Echo".

Simulator eLearning education is delivered in distinct components

1 Online eLearning Preparation

- 20-30 hours of study prior to workshop
- Tutorials
- Case Studies

2 Three Hour Simulator Workshop

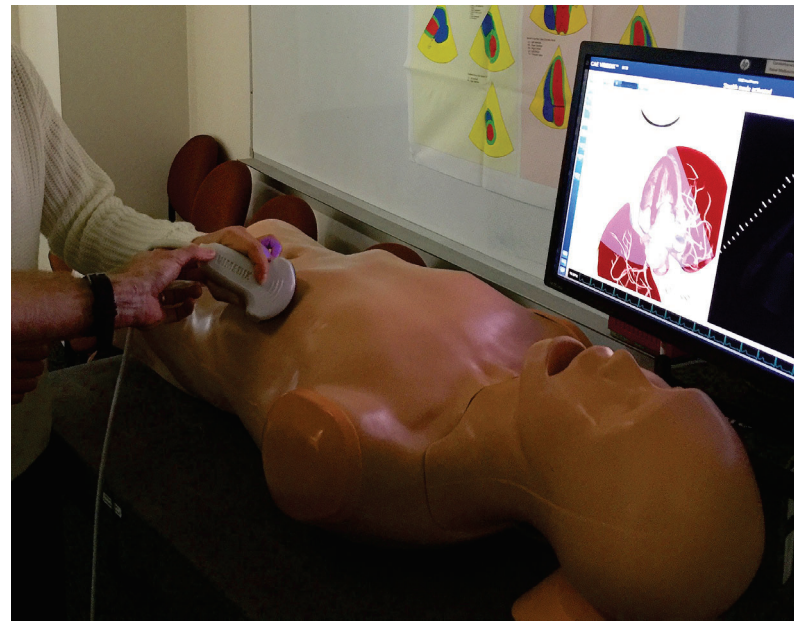

Managed at your institution to teach the correct use of the simulator and how best to perform image acquisition.

3 Self-directed Simulator Case Studies & Exam

After attending the simulator workshop, participants work through the online simulator case studies and complete exam.

4 Logbooks

Online logbooks to record clinical activity performed on patients.

The reading material and case study modules are available on smartphones, tablets, or web browser.

PC / Mac / iPad, Android & Windows tablets
