

iHealth Labs, Inc. iGluco Pro-v2
Mobile App Human Use Study

Sample email or note to patient

Subject: _____ (Sample subject: *Can you help me with a mobile app study?*)

Dear _____ (*patient name*)

Want to help me with the next frontier in Diabetes Management Technology?

I am recruiting patients with diabetes to participate in a *Human Use Study* with **iHealth Labs in Silicon Valley**.

Patients will be given an **iHealth Wireless [Smart Gluco Glucometer](#)** plus test strips to upload blood sugars automatically to the **iGluco Pro mobile app**.

The patient's CDE (*Certified Diabetes Educator*) will be able to review blood sugars and will receive **automatic alerts** for high and low sugars. CDEs and patients can **chat together** and work out plans and strategies for improvement. Patients can **share a journal** of activity, carb intake and medication use with the CDE. When the patient's CDE is not available there will be a **back-up CDE** ready to answer questions and assist as needed.

The study **begins November 1, 2016** and runs through the mid **January 2017**.

There is **no cost** to participate. All patient information is **secure and confidential**.

Patients will need to have an **Apple iPhone or iPod Touch** to use the app.

Go to (<http://web.ihealthconnect.com/jglucopro/>) to find out more information and to register for the study. Put me down as your Diabetes Educator.

Let me know if you have questions.

Yours,

_____ (CDE name)
