

CURRICULUM SYLLABUS

Twenty five years ago, I created Integrative Nutrition and the Health Coaching profession. I developed the theories of Bio-Individuality and Primary Foods. These two concepts alone will put you light years ahead of most health professionals in the field. These concepts are unique to our curriculum, and will produce dramatic results for you, your family, and your clients. We're the real deal, as you'll see in this syllabus.

Our program consists of 40 modules taught by world-class educators and industry experts on the topics of nutrition, personal development, coaching skills, and business training. After graduation, you'll be able to say you studied with Deepak Chopra, Dr. Andrew Weil, David Wolfe, and the best in the world.

Our comprehensive program will help you transform your health and career. I can't wait to work with you and teach you how to earn a great income doing what you love!

To your future!

Joshua Rosenthal
Founder, Director, and Primary Teacher
