### **Purchase of Digital Pigment Inkjet Prints**

Thank you for visiting my web site. I work with digital photography and film photography, producing beautiful, well-crafted pigment ink jet prints, silver prints, salt prints and platinum/palladium prints depending on the images selected.

#### **Digital Prints:**

Images can be ordered as prints only, prints with small black border, matted prints on simple black w/gold or white w/gold mats, Another option is a professionally matted and framed print using a four-ply window mat with beveled edges, black metal frames, and archival back boards. All digital prints are created using the Epson 3880 Professional Printer that produces archival pigment inkjet prints using a variety of papers such as Epson Signature or Professional papers as, Museo Max, Hahnemühle, and Moab papers.

### **Pricing of Archival Pigment Inkjet Prints:**
