

Featured Artist: Holly Wong

Through oil paint, graphite, charcoal, and alcohol ink on canvas and paper, **Holly Wong**'s patterned collages that reflect upon "how one's spiritual life can transform trauma and support growing resilience," she says.

"In my recent collaged painting series, I sublimate the scars of trauma from a family history of violence so that wounds can be alchemized into a form of radical repair," Wong explains. "I use the art-making process and my individual practice of mysticism to identify my pain and then transform it with densely layered imagery that acts as a salve."

The artist currently has a solo exhibition titled *Sacred Letters* on view at **ELLIO Fine Art** in Houston through June 21. Find more on Wong's [website](#) and [Instagram](#).
