Dear Customer:

The enclosed Material Safety Data Sheet(s) (MSDSs) is/are being sent as a result of either a request or a recent product order from PGI Nonwovens.

The Occupational Safety and Health Administration (OSHA) mandates the issuance of MSDSs pursuant to the requirements of the Federal Hazard Communication Standard (29 CFR 1910.1200). Although MSDSs are required only for "hazardous chemicals", PGI Nonwovens typically prepares MSDSs for most of our products whether hazardous or not. Even for products determined not to be hazardous, PGI Nonwovens believes that MSDSs offer important handling and safety information. To the best of our knowledge, the enclosed MSDS(s) is/are in compliance with the requirements of the OSHA Hazard Communication Standard. In most cases, we have provided more information than is required by the Standard.

For more information about the contents of this MSDS, please contact the Regulatory Affairs' phone number listed on the sheet. To obtain copies of MSDSs on other PGI Nonwoven products, call (501) 399-2537 or fax your request to us at (501) 379-2415.

Thank you for your interest in PGI Nonwovens products.

Sincerely,

PGI Nonwovens - Regulatory Affairs

SECTION XI - TOXICOLOGICAL INFORMATION

Reported Human Effects:

Based on Repeated Insult Human Patch tests on similar product, this fabric does indicate a potential for dermal irritation.

Reported Animal Effects:

Based on Primary Dermal Irritation test on similar product, that fabric is considered to be a mild irritant to the skin of the rabbit. The calculated Primary Irritation Index for the test article based on Draize Score was 1.13.

Reported Biological Reactivity Effects:

Severe biological reactivity (Grade 4) was observed in the L929 mammalian cells at 24, 48 and 72 hours, post exposure to the similar test article extract. Therefore, that test article is considered cytotoxic.

Carcinogenicity Information:

None of the components in the product at greater than 0.1% are listed by ACGIH, IARC, NTP or OSHA as a carcinogen.
