An environmentally, socially and economically sustainable product line

At Darnel we found a way to protect the environment by giving plastic a new opportunity.

resq[®] products are manufactured with:

- A minimum of 70% post-consumer recycled material sourced from bottles and packaging.
- Our material is suitable for food contact according to FDA regulations.
- We use less natural resources such as water and virgin raw material in their production process.
- They have 40% less carbon footprint during their life cycle than equivalent carton and paperboard packaging.
- They generate 55% fewer emissions than virgin product.
- We use 95% less water in their production than equivalent carton and paperboard packaging.

resq[®] makes the circular economy a reality.

In addition, **we reduce the amount of waste that ends up in landfills, or worse, in rivers and oceans.** And best of all, Darnel **resq[®]** products can be recycled over and over again to produce new packaging or other products such as clothes or rugs, thus reducing the amount of virgin raw material extracted from the planet.

resq[®] is a commitment to the environment and the communities that we serve.

Darnel has already recycled the equivalent of over THREE BILLION plastic bottles.

We design our factories and products to reduce our environmental footprint. We have ISO 14001 certification in environmental management and our production centers are certified Zero Waste level Gold.

We support hundreds of families who make a living from recycling.

We obtain recycled material from hundreds of families who make a living from recycling. Collecting these materials represents, in many cases, their only opportunity for economic development. And thanks to their efforts, many entrepreneurs have created hundreds of recycling centers throughout the region.

Reversible Bowls

Functionality and safety. This packaging may be used as a dome or container by simply inverting its position.

Dual-use functionality

Use this container as a Dome by simply reversing its position.

Ideal for serving or takeout

Convenience in a container that is suitable for eating at the dining table or for takeout.

High clarity

This container highlights food colors and textures. Also available in black.

Excellent option for hot food applications

Use resq® bowls for serving cold dishes and PS (Polystyrene) bowls for hot dishes.
