

Heavy Duty Shrink Films

Product Information Sheet

Product Description

Our Heavy Duty Shrink blends include: 3404B, DURAWRAP and HBF-154. At Berry our shrink films produced on mono-layer and co-extruded blown extruders use a variety of resin blends. Our shrink film blends, scientifically engineered with combinations of low density (LDPE), linear low density (LLDPE), and high-density (HD) resins, metallocene, and additives, provide premium performance in a wide variety of applications and environments.

Circular Solutions

Recycled plastic, Reduced Carbon Footprint*

* Vs. previous generation of Berry product

Features and Benefits

- 3404B - designed to provide excellent processing stability in high speed single roll bundling applications
- HBF-154 - designed to provide an economical film that provides a good balance of physical and shrink properties for a wide variety of shrink bundling applications.
- DURAWRAP - is a co-extruded blown film.

Regions Available

Mexico Central America Caribbean, North America

Product Information

Color(s)	Clear Custom Color
Gauge Range	.0015 - .010
Core Diameter	3" and 6"
Max Roll OD	40"
# of Print Colors	8
Min Roll OD	10"
Product / Item Construction	Singlewound Sheeting
Print / Vent / Treat / Perf	available
UV Protection	available
