

SparClean[®] Rinse Aid II 61

all temperature rinse aid

Rinse Aid II is an affordable and effective formulation that provides remarkable water sheeting to accelerate the drying of dishware and utensils in all temperature dish machines. With an acidic pH, Rinse Aid II helps to control mineral deposits left by hard water and food soils. The non-foaming formula will help maintain the machine's spray arm efficiency, providing optimal wash conditions for each rack.

Providing Quality Maintenance and Chemical Specialty Solutions with Unparalleled Customer Service

COLOR AND NUMBER SYSTEM

Each SparClean® product is color and number coded for easy identification. All product references and labels reflect this color and number, making training short and simple.

PACKAGING

All SparClean products are packaged in translucent 5 gallon pails and gallons. The clear packaging allows you to see exactly what remains in your container and enables timely reorder of your warewash products.

SUPPORT ACCESSORIES

Several dispensing options are available to compliment the SparClean warewash line of products. We will also smooth your transition with training materials such as a general application SparClean Warewash Wall Chart.

DIRECTIONS FOR USE

Some individuals may be sensitive to ingredients in this product. Before use, read product label and Safety Data Sheet. If questions remain, consult your employer or a physician.

DO NOT MIX WITH OTHER CHEMICALS

SparClean Rinse Aid II is formulated to ensure sheeting and drying of dishware in both high and low temperature dish machines.

1. Set the dispenser according to manufacturer's instructions to dispense SparClean Rinse Aid II during the rinse cycle.
2. Dose SparClean Rinse Aid II at 3–6 ml per rack of dishes.
 - a. Run several test racks to check for proper sheeting and drying of dishes. If sheeting and drying is not sufficient, increase dosage by 1 ml per rack until sufficient sheeting action is achieved.
 - b. For hard water situations an increased dosage of SparClean Rinse Aid II may be required.
 - c. Overdosing of SparClean Rinse Aid II can lead to decreased sprayer arm efficiency which can lead to poor results and is not recommended.

When using SparClean Rinse Aid II in a low temperature machine, ensure that 50–150 ppm of SparClean Sanitizer is also being used during the rinse cycle. When using SparClean Rinse Aid II in a high temperature machine, ensure that a minimum rinse water temperature of 180°F is maintained.

RESPONSIBLE CHEMISTRY

- Phosphate free
- EDTA free
- Contains biodegradable components
- Each SparClean is formulated to comply with various regulations. Consult Spartan's Letter of Guaranty for specifics.

SPECIFICATION DATA

pH (Concentrate): 2.0–3.0

Color: Light Blue

Stability

- Shelf @ 24°C/75°F: One year minimum
- Accelerated @ 49°C/120°F: 30 days
- Freeze/Thaw: Can withstand three freeze/thaw cycles
