

Technical Product Bulletin

BOOSTER PLUS

BOOSTER PLUS is for low to moderate hardness water where a heavy-duty liquid alkali is needed. The company designed BOOSTER PLUS for commercial laundries as well as institutional plants. The product contains sodium-based alkali additive for grease and soil removal and water hardness sequestrants. In addition, BOOSTER PLUS contains the preferred ingredient known to commercial and industrial laundering for higher titrations and better saponification.

Performance

BOOSTER PLUS contains a higher alkalinity factor for removing fats and vegetable oil stains. Effective in water hardness up to 10 grains.

Advantages

- Use BOOSTER PLUS as received. It requires no dilution.
- The product works well in high and low temperature and low to medium water hardness environments.
- It provides sufficient alkalinity for fatty oil-type stains.

Directions

- Medium soil: 2–4 ounces per 50 pounds of wash at 130°–160°F.
- Heavy soil: 4–6 ounces per 50 pounds of wash at 130°–160°F.

Handling

BOOSTER PLUS contains sodium hydroxide. Take precautions while handling. Do not take it internally. Upon contact with hands or eyes, flush with plenty of water and get medical attention. If possible, neutralize with mild acid, i.e., vinegar.

Packaging

BOOSTER PLUS is available in 5-, 15, 30, and 55-gallon containers.
