## Low Temp Rinse Aid

### DESCRIPTION

This product makes your dishes sparkle and shine. Perfect for all low temp automatic dishwashers, Low Temp Rinse Aid's sheeting action literally protects glasses and dishes from spots and stains. Low Temp Rinse Aid is a blue liquid concentrate that is added to the final rinse water in a low temperature dishwashing machine by rinse injector. It is formulated for use under a variety of conditions as well as working in conjunction with most automatic dispensing equipment. Low Temp Rinse Aid reduces the surface tension of water so that, instead of spotting, the water runs off, leaving dishware dry and clean.

Please read entire container label for detailed instructions and safety information.

### DIRECTIONS

1
