

SilverPower

Super Concentrated Enzyme Activated Solid Presoak

- Super Concentrated Solid provides superior results
- Avoids wasting time manually polishing silverware
- Reduces costs by eliminating product overuse
- Automatic dispensing saves time and eliminates waste

SilverPower

SUPERIOR RESULTS

Silver Power's concentrated formula loosens the soil quicker. Enzymes break down protein, starches and other soils. The surfactants penetrate, soften and help dissolve the most stubborn protein, fat and carbohydrate stains. Cutlery comes out of the machine like new, no food residue.

DE-TARNISHES CUTLERY

De-tarnishes silverware when used with aluminum foil. Maintains it as new without manual polishing, saves time and labor costs.

REDUCES COSTS, ELIMINATES WASTE

The dosage of silver power provides the right amount of product every time you press the button. Your Ecolab representative calibrates the dispenser to give the exact quantity of product, according to your particular needs.

THE CONVENIENCE OF PUSHING A BUTTON

The dispenser unit is installed above your soaking container. Just press the button to load the tank. No need to measure. No spilling or waste. Gives perfect results and precise control.

EASY TO USE

Convenient dispensing, employees use the correct amount, quickly and easily.

INSTRUCTIONS FOR USE

Your Ecolab representative will adjust the dispenser so that you add the correct amount of product for the pre-soak container.

FOR SOAKING CUTLERY

1. Place the tube from the dispenser into the pre-soak container and press the dispensing button.
2. Fill the container with enough warm water to cover the cutlery.
3. Add the cutlery and soak for 5 minutes.
4. Remove the cutlery and put them in a cutlery basket with the part that touches the food upwards. Do not use the utensils.
5. Place the basket into the warewashing machine.
6. Change the solution when it becomes dirty.

FOR DE-TARNISHING CUTLERY

Use the same procedure as above, but line the bottom of the pre-soak container with aluminum foil.

Consult your Ecolab representative for specific instructions for use.
