FABRI-SOFT

FABRI-SOFT is a highly active, multifunctional fabric softener and neutralizing agent for use on all types of fabrics.

Performance

FABRI-SOFT contains a unique surface active agent possessing properties that overcome harshness in the fabric that may be characteristic of the material itself or the result of the laundering process. Ingredients include cationic compounds such as imidazoline and quaternary ammonium products. These cationic surfactants ionize in solution, yielding positively charged ions. Cellulosic fibers, such as cotton, have a negative electrical charge when wet and consequently attract and hold the positively charged ions to their surface. Additionally, due to lowered fabric pH, FABRI-SOFT prevents grey-down from alkali carryover and residuals.

Advantages

- Reduces excessive wrinkling.
- Shortens extraction time.
- Reduces drying time and conserves energy.
- Easier shake-out and pressing.
- Easier to pull loads.
- Imparts fluffiness to the treated fabric.
- Feeds directly from easy-to-store-and-handle 2.5 gallon totes.
- Helps prolong the life of fabrics.
- Reduces static.
- Helps avoid sticking washer doors.
- Reduces and helps to control lint.
- Smoother finishes after ironing or pressing.
- Improves hand and luster of treated textiles.

Directions

Apply FABRI-SOFT as received to the final wash operation at a ratio of 1 ounce per 50 pounds of wash in cold or split temperature water.

Packaging

FABRI-SOFT is available in 2.5-, 5-, 15-, and 55-gallon containers.
