

Inno-Pak Microwaveable Hinged Containers

Packaging designed to keep foods fresh and appealing.

Break-away Hinge

Perforated hinge allows for easy separation of the lid from the base for one or two piece applications.

One piece, two looks

Black base, clear lid accentuates presentation of your food.

Divided Compartments

Clear lid seals between compartments to avoid messy food transfers.

Anti-fog Vented Lids

Lids resist fogging and are vented to reduce condensation, allowing for a clear view of your product.

Stackable

Open clamshells easily nest to reduce space requirements, and closed clamshells sit securely atop each other to reduce sliding.

Perimeter Seal

Avoid spills and improve customer satisfaction with a leak resistant seal.

Durable and Crack Resistant Material

Polypropylene is a tough material that is heat lamp, warming unit, and microwave safe.
