

Ellen Petry Leanse

Elevating Human Intelligence and Potential in the Time of AI

Technology pioneer, neuroscience educator, best-selling author: Ellen's history, charisma, and subject matter expertise inspires global audiences to think different and dream big. Through keynotes, workshops, and team events, Ellen uses a friendly, useful approach to neuroscience to activate creativity and motivation for groups of any size.

TOPICS

- **Intelligence Reclaimed:** 10 intelligences to cultivate as we integrate with the power of AI
- **The Neuroscience of Creativity:** proven paths to elevating creative potential, based on my top-rated Stanford University course
- **Power and Presence:** an inspiring, motivating, science-backed approach to elevating female leadership
- and more

"Ellen opens eyes and inspires minds. Our team continues to apply her paths to being more collaborative – and creative."
