

NICOLLE MERRILL

HYPE-FREE AI TALKS

"Your talk, Curious Conversations in the Age of AI, was the perfect way to close the first day: inspiring, thought-provoking, and truly aligned with the spirit of the event."

Porto Business School, Alumni Weekend, 2025

Nicolle Merrill makes AI approachable for anyone without a technical background. As founder and CEO of Boring AI, she has trained more than 30,000 professionals across 13 countries to use generative AI at work with confidence. Nicolle specializes in workforce strategy and upskilling for non-technical teams for AI.

Before founding Boring AI, she spent seven years designing human-centered AI on product teams. In 2019, she published the career book, *Punch Doubt in the Face: How to Upskill, Change Careers, and Beat the Robots*, to help people navigate a changing workplace.

Nicolle also teaches AI strategy and workforce transformation at Porto Business School. Her virtual keynotes cut through the AI hype to focus on the adaptability and change that people need now. She skips the predictions and fluff to deliver practical AI strategies that people can actually use.

"Nicolle was everything I wanted her to be. Her pragmatic approach to AI resonates. She gave the audience permission to be skeptical, but also to explore and play."

AI Portland, 2024

2026 TALKS

Sustaining AI Momentum: From Initial Training to Ongoing Practice (60 min)

What happens after the first AI workshop? This talk gives leaders practical strategies for turning AI training into lasting capability.
