

CRITERION ELEVATE

COMPACT MLOC/BCR SORTER

KEY FEATURES ≡

- » Smallest footprint sorter with multi-tier bins
- » Handle the widest range of mail, from postcards to flats
- » Compact design with built-in casters for ease of relocation between peak processing periods
- » Single-phase and three-phase power options
- » Industry-leading functionality

A SORTER WITH A SMALL FOOTPRINT AND ADVANCED FUNCTIONALITY

The Criterion® Elevate sorter has been designed to meet high-speed mail processing needs of organizations with strict space limitations. The Criterion Elevate is ideal for processing various types of mail including:

- » Vote by Mail envelopes/mail ballots
- » Incoming mail
- » Outgoing mail
- » Flats mailpieces

The Criterion Elevate sorter greatly reduces the amount of space needed to run a sorting operation, while still processing at high speeds. With two-tier bins, the sorter has one of the smallest footprints in the industry. It is portable for easy relocation so you can move the sorter where you need it, when you need it.

The Criterion Elevate sorter handles a wide range of mail types, from postcards to flats, and a variety of processes, from simple barcode sorting to complex database lookups and image processing.

It supports all the devices from our larger sorters, resulting in the most comprehensive processing capabilities on a sorter.

COMMON SPECS	
Document Specs	<p>Height: 3.5" – 7.0" (88.9 – 177.8 mm) (up to 13" (330.2 mm) with optional flats package)</p> <p>Length: 5.0" – 11.5" (127.0 – 292.1 mm)</p> <p>Thickness: 0.007" – 0.250" (0.18 – 6.35 mm)</p> <p><i>*Please contact us about processing thicker envelopes</i></p>
Cycle Speeds	18,000 p/h (for #10 envelopes, MLOCR mode)
Dimensions with 16 2-tier bins (L x W)	14.3' x 6.2' (4.36 x 1.89 m)
Bins	Number of tiers: 1-2
Power	Single phase/three-phase, amps depend on configuration
Air	No air required with the cartridge printer option

MMT SABRE

MMT SABRE®, our multi-line optical character reader, is an omni-font software-based image processing system with industry-leading read rates that can perform a variety of functions:

- » **Outgoing mail processing:** Converts a mailpiece's outgoing address to the appropriate delivery point Intelligent Mail® barcode
- » **Inbound mail processing:** Includes several read modes, from barcode reading to complex inbound database lookups

- » **Mail ballot processing:** Inline Automated Signature Verification integrated with complex inbound database lookups

MODULARITY

When your sorting needs change, additional devices or software can be added to the Criterion Elevate sorter to expand its capabilities with minimal interruption to your operation. Available options include:

Integrity: A thickness detector, height detector, doubles detector or indicia verifier can be added to assure the quality and integrity of the sorting process

- » **Check/MICR detection:** A MIPR (Magnetic Ink Profile Recognition) device can be added to sort based on the presence or absence of checks, or other MICR marks
- » **Inline selective opener:** An inline opener that allows selective opening of the bottom edge of envelopes based on the sort scheme, without damaging the contents
- » **WayMark®:** A postage payment solution that verifies the weight of every mailpiece, calculates postage, and optionally prints customized indicia in one operation, saving money on meters, labor and supplies. Compliance with postal standards is achieved by verifying payment amounts based on conformance of mailpieces to the claimed weight categories

Fluence Automation has designed and developed leading-edge sorting solutions based on a wide range of operational needs. We are dedicated to increasing your processing performance, decreasing your costs and reducing your risks by developing modular, reliable and flexible mail processing solutions.
