Your fastest, simplest setup

From Excel to IntouchCheck in minutes, not hours. Build checklists and audits with our easy-to-use drag and drop functionality so you can get started right away.

Your processes, your way

From pass to fail, red to green, A to F - and everything in between. Bring your custom audit process to life with customizable options for scoring, sections and more.

Richer audits. Better results.

Add & comment on photos

Take and upload photos of specific items on your check. Set whether photos are required for certain items.

Verify accuracy with time & geo-stamps

Auto record the length of time performing the audit, and where it was completed.

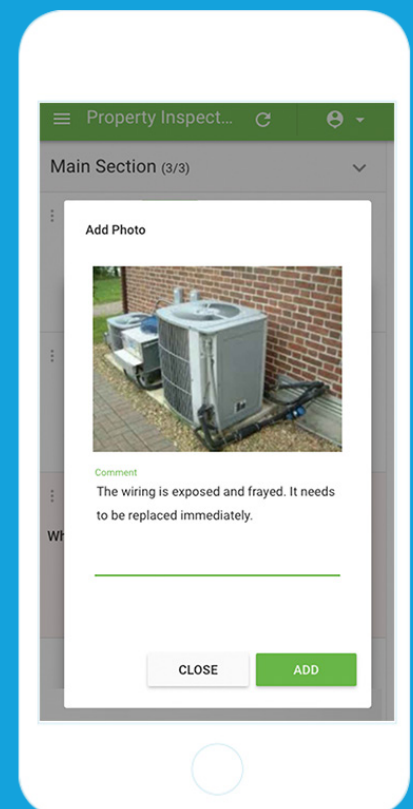

Collect signatures

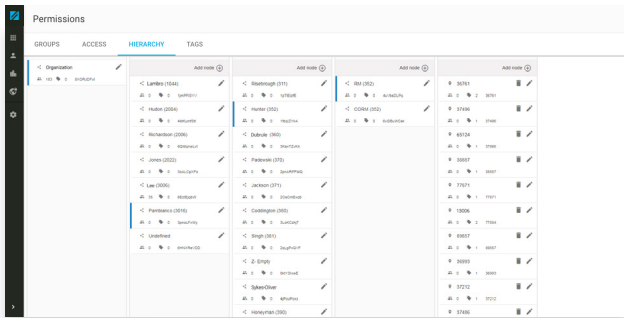

Collect auditor and auditee signatures before submitting.

Flag problems

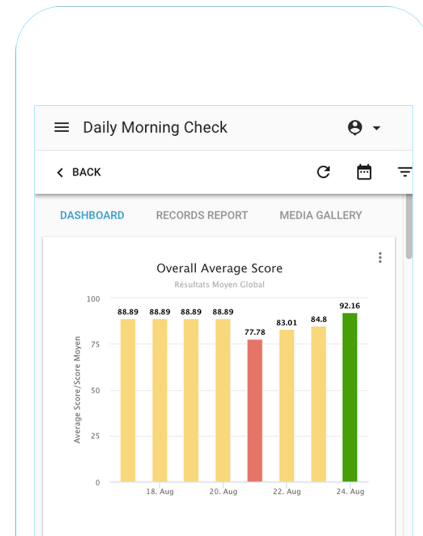

Flag when items require attention or action.

Easily customize the who-what-where

Setup permission groups for different users, checklists and hierarchies to manage who can complete what checklist and where.

Review and manage all in one place

Get an instant picture of your operations, view score breakdowns and top issue lists. Analyze locations and regional performance. Drill into scores and audits, and from there, view photos and follow ups.

Fix issues & drive performance with follow ups.

Assign users & set due dates

When actions are required, teams can assign users to action them, and set due dates.

See list of issues assigned to you

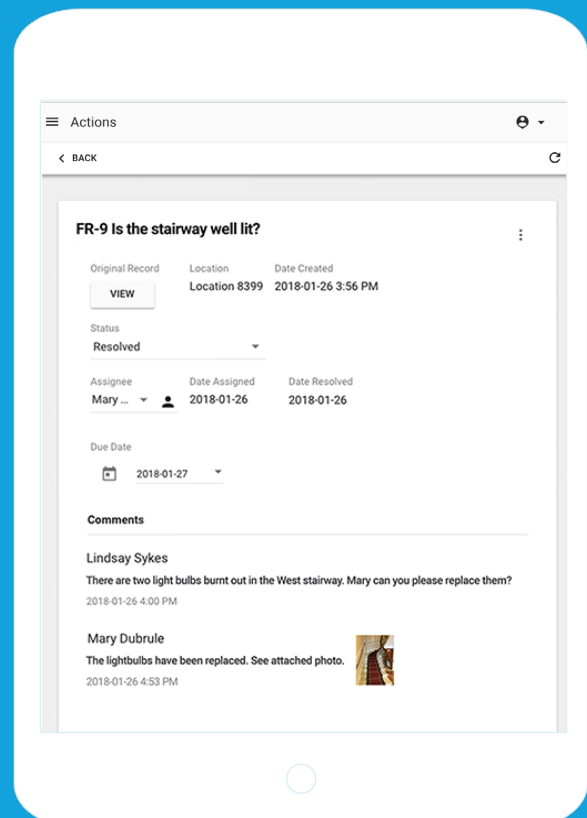

View and prioritize your day with a list of actions you need to take in order of due date.

Share updates and images

Teams can share updates and discuss issues in IntouchCheck, so there's always an accessible history of what's going on with a follow up.

Resolve when fixed

When actions are complete, teams can mark them as resolved.
